About the Author

Adam Armstrong is a sex coach.

He specialises in teaching men how to become better lovers. The reason why he is able to do this so effectively is because he spent years figuring out why most men are clueless when it comes to women and why so many women are dissatisfied in bed with their men.

It wasn't easy for him to work all of this stuff out, largely because most of the mainstream sex advice to be found in magazines, on television and on the internet proved to be inadequate. And the stuff in so-called "scientific literature" was often no better.

It seemed that most so-called "sex experts" skirted around the real issues for fear of offending people, or simply because they did not really know what women wanted, needed and craved in the bedroom and much less how to teach men the skills required to become dynamite with women.

Luckily for you, Adam has this stuff figured out.

He is not afraid to speak his mind and at times uses some, how shall we say; colourful language! He might challenge your beliefs and seriously make you question what you previously thought was true about female sexuality.

But if you go with it and read, listen and watch Adam's programs with an open mind, you will become a better lover and enjoy a superior sex-life than you ever previously imagined you could.

Tell Your Friends

This book is the ultimate guide to giving your woman the most intense pleasure of her entire life – including clitoral, vaginal, multiple, squirting and anal orgasms.

Introduction.

Hey it's Adam Armstrong here.

And in the 'Ultimate Orgasm Techniques' program – you are going to discover how to give your woman earth-shattering, body-shaking orgasms using the most remarkable, powerful and proven sexual techniques on the planet.

To start off with, I'd like to share some orgasm statistics with you so that you understand the type of sexual pleasure most women are used to receiving during sex.

“

Here we go...

Somewhere in the region of 20-30% of women have never had an orgasm.

Somewhere in the region of 20-30% of women have **never** had an orgasm.

Not a single one.

I really feel for such women because they are missing out on one of life's most precious gifts.

The second group of women is where the majority of women are at. Depending on the statistics we look at, it is safe to say that somewhere between 50% and 70% of women have only ever experienced clitoral orgasms.

And finally, we get to the group of very lucky women who have experienced vaginal orgasms. Again, different statistics tell slightly different stories, but whatever the exact case – one thing is for sure... the percentage of women who have experienced vaginal orgasms is pretty low (somewhere between 10% and 30%).

You should also keep in mind that many of those women who have had vaginal orgasms do not necessarily have them regularly.

Said differently, only a tiny percentage of women have vaginal orgasms on a regular basis.

At this point I'll also point out that vaginal orgasms lay the foundation for squirting and multiple orgasms and to some extent – anal orgasms too.

So if you want to be a truly great lover, a guy who is capable of giving his woman THE BEST SEX EVER – you really have to give your woman vaginal orgasms because when you do... a whole new world of sexuality will open up for you and her to share.

So now that you know how few women are receiving regular, incredible sexual pleasure from their men, let's take a look at...

Why Most Average Guys Are Lame In Bed...

You may think it is harsh of me to say that most average guys are lame in bed. Perhaps I could have been more politically correct about it and said that most average guys are 'okay' in bed or that most average guys just 'need a little help.'

But I'm not in the business of B.S.

On the contrary, I only deal in the truth and if I offend a few people along the way - I'm cool with that because I know that I'll help tons of people in the process too.

So I stand by what I said - the average man is LAME IN BED.

I mean, think about it - women are capable of **vaginal, squirting, multiple and anal orgasms** and yet most men are only giving their women clitoral orgasms and quite a lot of men are not getting their women off in any way at all.

I'd say that's pretty lame.

Wouldn't you *agree*?

You know, sex is a really weird thing because virtually every man wants it and wants to be good at it, but very few have the common sense to seek help when they need it.

Somewhat of a contradiction, don't you think?

I mean, if you or I wanted to be good at Golf or Tennis, Football or Boxing, Basketball or Chess - we'd probably hire a good coach to share his knowledge and help us along the way.

Same with Business – if we wanted to set up a successful business, we'd seek out the advice of people who've 'been there and done it'... people who have already produced the kinds of results we'd like to experience in a given area of our lives. However, when it comes to sex – most guys are too EMBARRASSED or have too much of an EGO to seek out advice and that's why they remain lame in bed.

Think about it – how many people ever become outstanding at something (or even moderately good) without some help from someone who's already produced excellent results in the area they wish to excel at?

You have my total respect for wanting to learn how to sexually satisfy your woman...

Not many is the correct answer to that question.

So you my friend - you have my total respect for wanting to learn how to sexually satisfy your woman and by using the 'Ultimate Orgasm Techniques' program, you are separating yourself from the 90+% of guys who are lame in bed and will remain lame in bed because they are too damn stubborn to do anything about it.

Well more fool them.

You and I - and our women - will have all the fun!

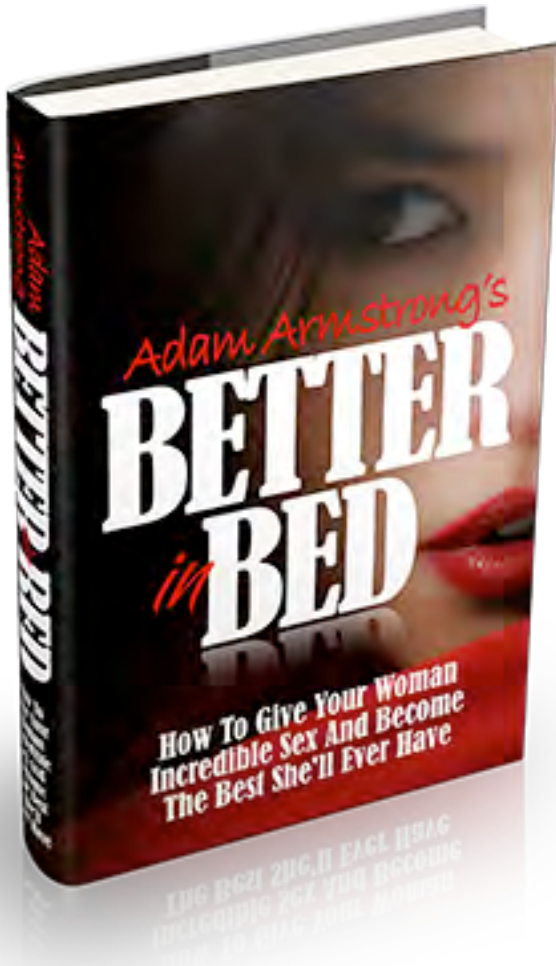

Now, let's dig a little deeper and talk about the three things you really need to possess in order to give any woman incredible sexual pleasure...

Beliefs, Sexual Techniques And Dominance

First, you need to have good sexual beliefs.

Secondly, you need decent knowledge of female anatomy and the best SEXUAL TECHNIQUES on the planet.

Finally, you need to be able to take control and lead your woman. In other words, you need to be sexually dominant in the bedroom.

This program, 'Ultimate Orgasm Techniques' focuses on female anatomy and sexual techniques.

The next thing I'm going to talk to you about is **Sex Toys** and more specifically...

You can learn more about how to develop empowering sexual beliefs and discover how to be sexually dominant in the bedroom by reading my book **Better In Bed**.

Why Most Sex Toys Absolutely Suck

When I say that most sex toys absolutely suck, I am referring to dildos and vibrators. (There are some sex toys, like [The Remote Control Egg](#) – which can be incredibly good fun).

For clarification, a Dildo is a penis shaped sex toy and a vibrator is a penis shaped sex toy that vibrates.

DUH!

Yeah, I know, pretty obvious – but I just wanted to check that we were on the same page before I move on.

So here's the deal...

Some men think it's a good idea to buy a dildo or vibrator to help 'get their women off.'

However, this is in fact a really bad idea.

Here's why...

The average guy is either not giving his woman orgasms or he's only giving her clitoral orgasms, but the fact is that **all** women crave vaginal orgasms (even if they don't say so).

So the average man brings home a dildo or vibrator (which is usually much bigger than his own 'little chap') and he uses it to pleasure his woman. Now the reality is that the sex toy probably won't give his woman vaginal orgasms, but if it does – that's BAD NEWS.

Now you might be thinking:

"Hold on Adam, you just said vaginal orgasms were a good thing"

Yes I did, but can you imagine what the average man's woman thinks when he's never given her a vaginal orgasm and then all of a sudden he does it for the first time using a dildo or vibrator?

A dildo or vibrator much bigger than his own 'little chap.'

Ouch.

That's right – his woman now thinks it's a size issue.

Then she starts to associate more 'size' with an increase in her sexual pleasure. And do you think she'll be forever happy with her man and his collection of sex toys?

Nope, she'll want the real thing.

In other words – she'll start fantasizing about a man giving her vaginal orgasms while he is having intercourse with her. A man with a much bigger penis than her current man has.

Then she might CHEAT on him or totally leave him for a man with a bigger 'tool.'

Did you know that 50% of women admit to having cheated at least once in their lives and the biggest reason for cheating was to GET BETTER SEX?

If that's not a really hard kick in the nuts for any man, then I don't know what is. But anyway, what's the truth?

Does 'size' really matter?

The short answer is:

No it doesn't, and you'll see why I say that as you progress through this program and then try out the orgasm techniques for yourself.

But if you go about things the wrong way, like our 'average guy' did in the previous example - it is possible to condition your woman to think that size matters.

I must just state that it is unlikely that a big sex toy is going to give a woman her first vaginal orgasm. But that doesn't mean that 'average guy' with his sex toy is out of trouble just yet.

You see, if he doesn't give his woman vaginal orgasms during intercourse - she's not really fulfilled by it. I don't care what a woman might say (in order to protect her man's feelings); she's not fulfilled unless she comes during intercourse.

But, if 'average man' uses that big, thick sex toy to pleasure his woman - he might end up giving her more 'feeling downstairs' than she is used to experiencing when he has intercourse with her because the increased size will stretch her open a bit more than she's used to.

So even though the sex toy doesn't 'get her off', it does make the penetration more pleasurable.

What you can clearly see is that these kinds of sex toys (dildos and vibrators), are rarely a good thing.

With that said, once you are regularly giving your woman vaginal orgasms during intercourse - and you are going to find out how to do this regardless of your 'size' - you can then use whatever sex toy you want because your woman will be SEXUALLY ADDICTED to you. Guaranteed.

That's the power of vaginal orgasms during intercourse.

With all that said, let's not jump the gun or get ahead of ourselves. Before we talk about vaginal orgasms, let's discuss the most basic orgasms - clitoral orgasms...

Part 1: How To Give Your Woman Clitoral Orgasms

In this chapter I'm going to teach you several simple and highly effective techniques that you can use to give your woman clitoral orgasms..

Tell Your Friends

Part 1:

How To Give Your Woman Clitoral Orgasms

**None of what I said in the introduction
was meant to imply that clitoral orgasms
are a bad thing.**

“

***Clitoral Orgasms
give women
incredible sexual
pleasure and are a
great way to start
any sexual session.***

Indeed, nothing could be further from the truth.

Clitoral Orgasms give women incredible sexual pleasure and are a great way to start any sexual session.

The first orgasm I usually give my girlfriend during any sexual adventure that I take her on is a clitoral orgasm. It's almost become a 'warm up'... It gets her hot, wet and SEXUALLY EXCITED and ready for the more intense, powerful orgasms that are to come.

With that said, there are several reasons why clitoral orgasms alone are not enough to totally satisfy your woman and I'd like to share those reasons with you right now...

For starters, once you stimulate your woman's clitoris to the point of orgasm – it will usually become too sensitive to touch. This makes the clitoral orgasm much like the male orgasm – once you've had one, you get overly sensitive and need some time before you can have another.

Have you ever had one of those experiences where you give your woman a clitoral orgasm and then try to give her another and she stops you from touching her in that spot?

Well, the reason why she stops you is because her clitoris has become hyper-sensitive and this hyper-sensitivity is perfectly natural. You can't do anything about it. However, what it means is that it's virtually impossible to give your woman MULTIPLE ORGASMS if all you do is give her clitoral orgasms.

The second thing to keep in mind about clitoral orgasms is that they are usually something your woman can give herself.

Now, that's not to say that she doesn't prefer it when you do it – but essentially you are doing something for her that she can do herself.

And if you have intercourse with your woman and she rubs her clitoris to 'get herself off' during the process – you might as well not be inside her! After-all, she can make herself come just fine by touching her clitoris during masturbation.

You might think it's better if you rub her clitoris during intercourse, but the reality is again that you might as well not bother to have intercourse – you might as well just stimulate her with your fingers.

The final thing to keep in mind about clitoral orgasms is that most women describe them as an EXTERNAL sensation.

Again, this makes clitoral orgasms very similar to the orgasms that we men feel. Makes sense, right?

After-all, both the clitoris and penis are on the outside of the body and women say that the feeling as they come is focused heavily on the genitals, much like it is for a man.

In contrast, women describe vaginal orgasms as more of an INTERNAL, 'total-body' experience. As men, we do not really have a comparable frame of reference, but suffice to say – most women really like clitoral orgasms but the women who have had vaginal orgasms absolutely LOVE them, become sexually addicted to the man who gives her them and are often brought to tears when they have them (especially after the first vaginal orgasm they have or a particularly intense one). The bottom line is that all orgasms are good, but vaginal orgasms are much more powerful than clitoral orgasms... but more on that later... because you have to walk before you can run.

So right now, let's discuss the two main ways that you can give your woman a clitoral orgasm.

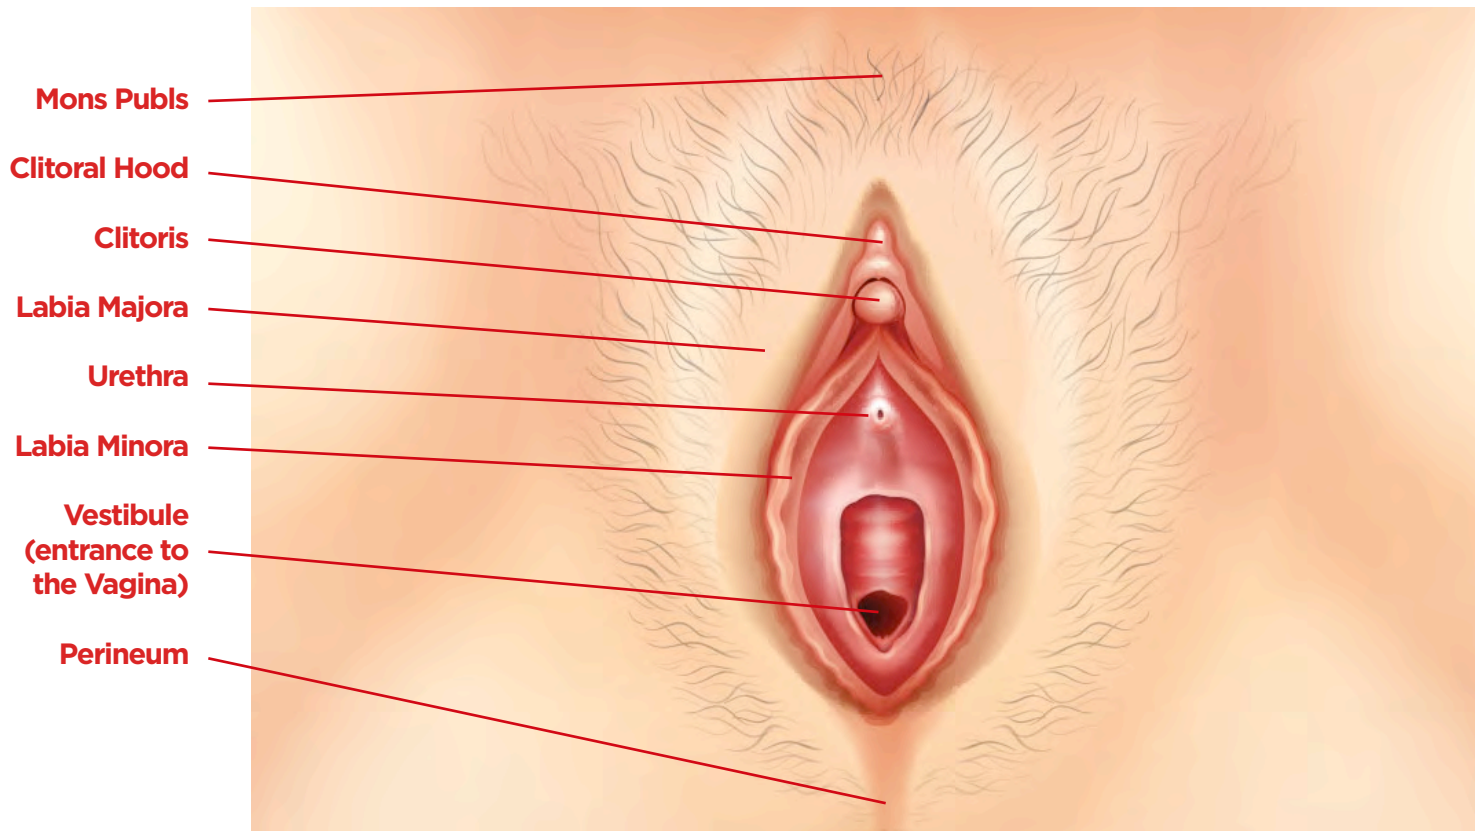

The first way is using your fingers and the second way is by giving her ORAL SEX...

Clitoral Orgasms Using Your Fingers

Many men don't know where the clitoris is, so we better start off by clarifying that little nugget of knowledge.

If your woman was to lie on your bed, on her back, with her legs open and you were to stand between her legs (looking directly at her genitals), her clitoris would be located just above the vagina.

This image will help you to visualize exactly where the clitoris is:

Please note that the vagina is the actual hole itself and not a generic name for the entire female genitalia, although it is often misused in this way.

When your woman is highly aroused, her clitoris will become firm and easy to locate. The clitoris actually contains erectile tissue - just like the penis - which explains why it stiffens up when a woman is sexually aroused.

You need to be aware that the clitoris is covered by the clitoral hood and some women respond best if you gently pull the hood back and directly stimulate the clitoris, whilst others find this too intense and prefer stimulation of the clitoral hood as opposed to the exposed tip of the clitoris itself.

With regards to clitoral stimulation, there are three basic things you need to be aware of...

Pressure, Speed And Motion

When you are stimulating your woman's clitoris you need to be aware of how much PRESSURE you are applying, the SPEED of your movements and the exact MOTION you are using.

Many men think they are doing well if they just find their women's clitoris, but if they don't pay attention to pressure, speed and motion – they may do more harm than good.

You see, some women like a lot of pressure, while others like less.

Some women like a faster speed of movement and others like a slower tempo.

And motion refers to specific styles of movement or techniques that you are using and it's your job as a guy to find out what technique your woman responds best too.

If you focus on those three things, you will be doing enough to get most women off.

Find a pressure she likes; always starting out gently and then gradually increasing.

Find a speed of movement she likes; starting out slowly and gradually getting faster.

And find a motion she responds best too – maybe she likes having her clitoris rubbed from side to side, or perhaps she prefers it stimulated up and down. If you watch women masturbate, many of them actually rub their clitorises in a circular motion – which is something else you can try.

Whatever the case, keep these 2 rules in mind:

- **As she gets more 'turned on' she'll probably enjoy more pressure**
- **As she gets more 'turned on' she'll probably enjoy more speed**

Notice that I said *probably*.

The reason why I said probably is because every woman is different and you still need to patiently figure out EXACTLY what your woman likes best.

With all that said, there are two very powerful, very specific sexual techniques that I'm now going to share with you for giving your woman a clitoral orgasm using your fingers.

The first technique is called **The Welcomed Method**.

The Welcomed Method

This orgasm technique comes from a group called “The Welcomed Consensus,” who are based in California.

Unlike most men, these guys clearly give a damn about pleasing women and I’m certainly very glad that they shared this technique. And once you use it with your woman – I’m sure you will be too.

Despite the power of The Welcomed Method I’ve never seen it mentioned in any mainstream sex advice. Not once in a single magazine article, television or radio program. So it’s fair to say that very few women have ever had the pleasure of their man using The Welcomed Method on them; which is a shame because it works *incredibly* well.

However, you should look on the bright side and realize that because very few women have ever experienced it – when you use it on your woman... you’ll totally blow her mind.

Nice.

Here’s how it’s done:

The whole technique involves stimulating the tip of your woman’s clitoris at the one o’clock position using the tip of your index finger on your right hand.

The one o’clock position is based on you looking directly at her clitoris while standing between her legs. (However, you won’t be standing between her legs when you use this technique).

Don’t worry, it’s not that complicated.

What you want to do is to have your woman lie on her back with her legs open. Next, lubricate the index finger of your right hand using good quality lubrication. I like to use ID Millennium because you tend to only have to apply it once – it doesn’t dry out half way through, unlike many lubricants. [Click here to grab a tube now.](#)

The use of lubrication is essential to increase your woman’s pleasure and avoid causing her any pain.

Once you have your woman on her back with her legs open and you have lubricated the index finger of your right hand, you need to lay on your woman’s left side, perpendicular to her.

Silicone-based lube maintains its slipperiness throughout your session and doesn't go dry half way through

From here, your left arm goes under her left leg and the fingers of your left hand go under her bottom.

Next, put your left thumb on her perineum and apply moderate pressure.

The perineum is the small area of skin between her vagina and anus.

Now, put your right hand on top of your woman's patch (or where her patch would be if she's shaved or waxed). Then very lightly put the tip of your right index finger on her clitoris and start rubbing it at the one o'clock position.

The strokes you use need to be about half an inch long and at a rate of 2 per second.

Keep doing this light movement over and over again. Your woman will very quickly feel incredible sexual pleasure and get to the point just before orgasm.

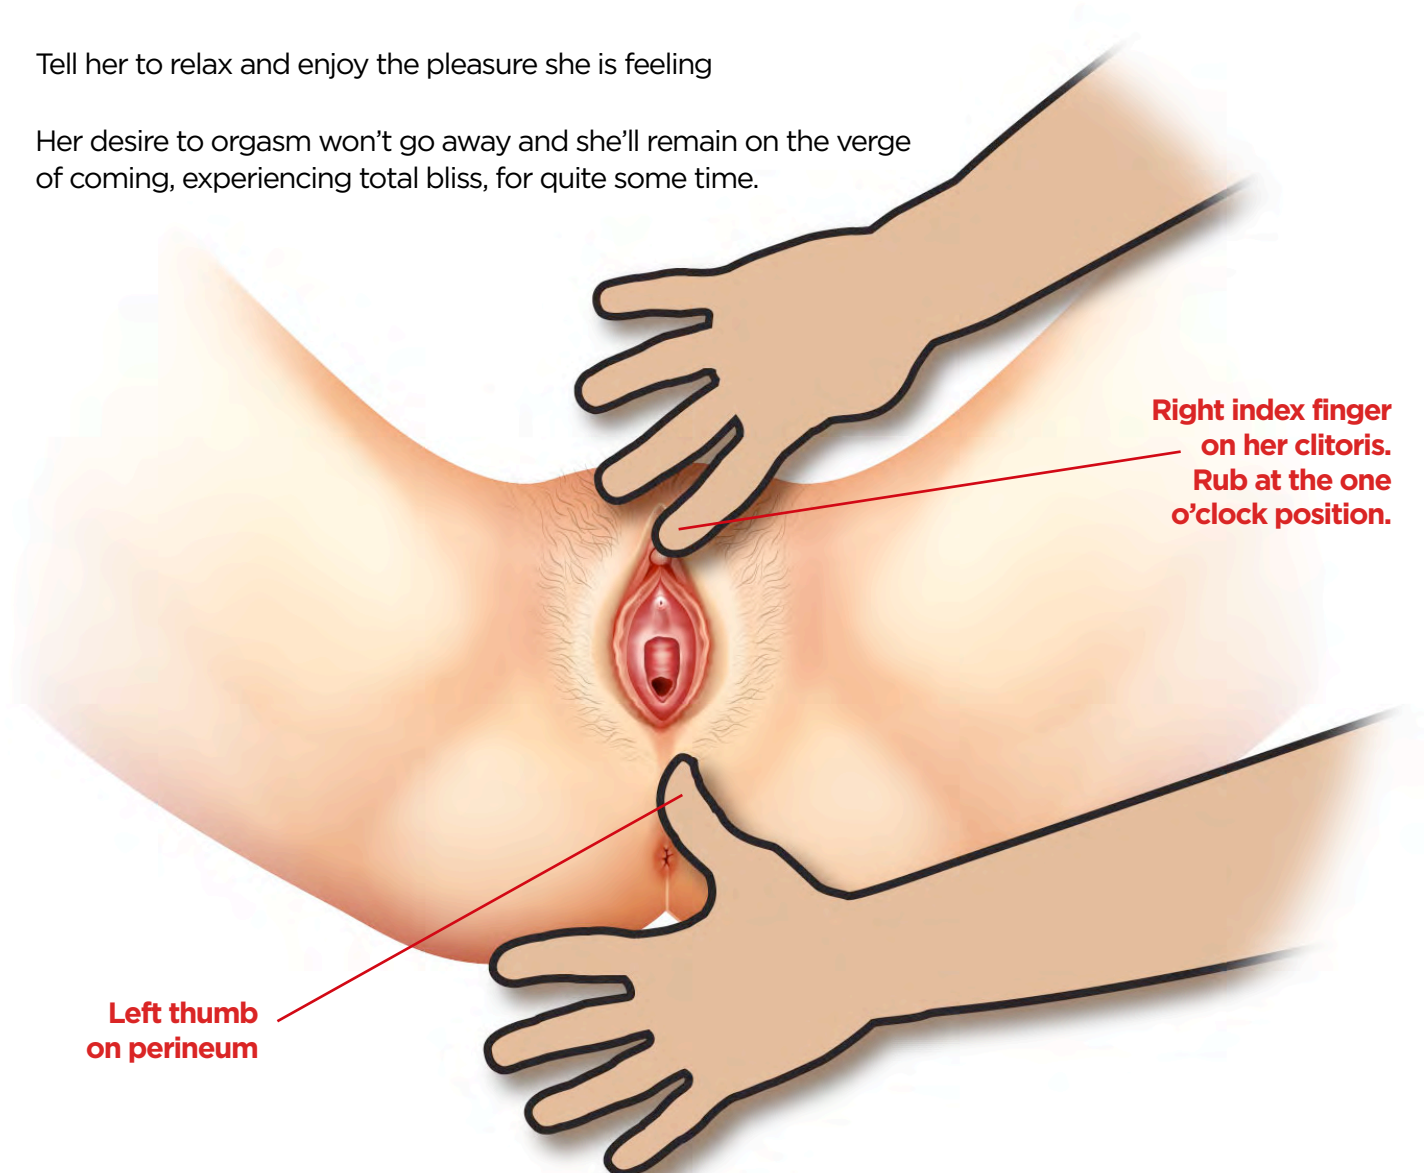

If you want to extend her pleasure, you can do two things:

Decrease the pressure of your strokes

And/or...

Tell her to relax and enjoy the pleasure she is feeling

Her desire to orgasm won't go away and she'll remain on the verge of coming, experiencing total bliss, for quite some time.

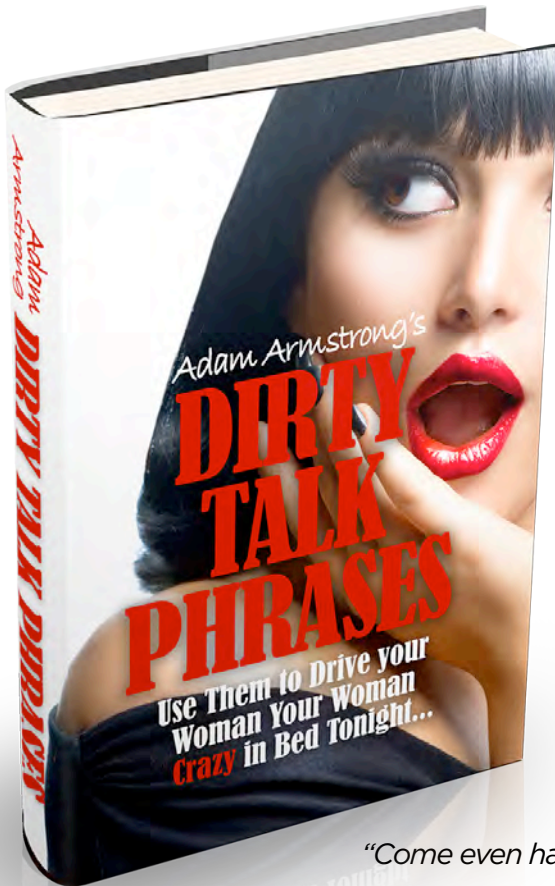

**Left thumb
on perineum**

**Right index finger
on her clitoris.
Rub at the one
o'clock position.**

Do this right and she *will* eventually BEG YOU to let her have her orgasm.

When you feel the time is right, you should lead her through the orgasm by saying something like this:

YOU: "Baby, you really want to come right now, don't you?"

HER: "Yes I do"

YOU: "You're going to come when I tell you to"

HER: "Okay, please let me come"

YOU: "When I give you permission to come, you're going to come hard"

HER: "Please tell me to come"

Then all you do is just slightly increase the pressure of your stroking and tell her to:

"Come for me baby"

"Come hard"

"Come even harder"

And she'll do it.

It works every time.

The combination of The Welcome Method and some clever DIRTY TALK will get her to link your voice to her orgasms.

A very powerful combination.

For this to work; your woman must respect you and she must take you seriously. If your woman doesn't take you seriously, she will not come when you tell her too.

Right now, let's check out another clitoral orgasm technique...

In my program Dirty Talk Phrases program I give you examples of dozens of tried and tested dirty talk phrases that you can take and use 'as your own.' Check that out by [clicking here](#)

Another Way To Give A Woman A Clitoral Orgasm Using Your Fingers

This second technique for giving your woman a clitoral orgasm using your fingers is very effective.

You basically use your middle and index fingers of either your left or right hand to move your woman's clitoral hood up and down over her clitoris.

You need to liberally lubricate your fingers before you begin.

Once you have lubricated your fingers, you need to part your woman's labia with your fingers (the labia are the lips of her vagina).

Once you've parted her labia you can then apply inward pressure with your middle and index fingers and gently squeeze the clitoral hood.

From this position, just move the clitoral hood up and down.

As ever, you must find a pressure and speed of movement that your woman likes and when you do – keep going and you can expect her to have a powerful orgasm. Of course – if you talk dirty to her as you use the technique, that's even better.

Now let's move on and look at how to give your woman mind-blowing ORAL SEX...

Oral Sex Techniques

Women love great oral sex – the key word being ‘great.’

If there’s one thing that ruins oral sex for a woman, it’s when a man goes down on her and shows no enthusiasm or passion. In other words, he gives off the vibe that he’d rather be doing anything other than giving her oral sex.

When a man gives a woman unenthusiastic, passionless oral sex, not only does it lessen the enjoyment for the woman – it can also make her feel uneasy or self-conscious about her vagina.

And no man should make a woman feel that way.

As ridiculous as it sounds, I’ve had a few men email me and ask what they should do because they don’t like the smell of their woman’s vagina!

My answer was that:

“Every great lover gets off on the smell of his woman’s intimate parts”

With that said, a woman’s smell ‘downstairs’ can be affected by what she eats and drinks, just like a man’s semen can be affected in the same way. So it is possible that certain women might be less than great tasting down there because of poor nutritional choices.

But seriously, any guys who claim to ‘hate the taste of pussy,’ need to seriously question their true desire to please women.

And if that desire isn’t there – they should stick to masturbation.

It’s only fair.

So the first rule of giving your woman GREAT ORAL SEX is to be **enthusiastic and show some passion.**

Make some noise while you are at it too because this will really turn your woman on. I know you can’t talk dirty while giving your woman oral sex, but that doesn’t mean you should be silent.

The second rule of giving your woman great oral sex is to avoid going straight for her clitoris before she is really wet and turned on.

Instead, you should get your woman extremely sexually excited before you lick her clitoris.

I often like to TEASE my woman while building up to giving her oral sex.

Teasing is extremely powerful and builds anticipation.

Let me give you a few examples that you can use for yourself:

When you are kissing your woman and she is getting excited, put your hand between her legs on her panties and then turn her head to one side and say this in her ear:

"Baby, I can't wait to taste your wetness"

This line drives women crazy and gets them thinking about the oral sex you are going to give them

Another great way to tease your woman and build anticipation is to lick all the way up her left leg (so that your tongue nearly touches her genitals, but not quite). Then lick all the way back down again.

Then do the same on her right leg.

Run this cycle a few times, breathing onto her vagina through her panties in between licking her legs. Do this slowly; take your time (make her wait) and she will very quickly start to BEG YOU for more.

Obviously, when she begs you – you TEASE HER some more ;)

Brilliant.

When you have your woman's panties off and she can't wait to feel your tongue on her wetness – you still don't have to lick her clitoris straight away.

Instead, you can lick and suck her outer labia.

You can even gently bite her outer labia.

You can tongue-fuck her vagina.

And then, when she's practically ready to explode – you can start licking her clitoris.

(Or you can tease her a little more, depending on what mood you're in).

Do you now see what I mean when I say TEASE your woman and build ANTICIPATION? Try some or all of these techniques for yourself and you'll be amazed by how well they work.

Moving on, let's take a look at how to actually lick your woman's clitoris to give her a powerful orgasm...

First off, let's get one thing out of the way...

You know that oral sex technique where a guy supposedly traces the letters of the alphabet on his woman's clitoris with his tongue?

It's nonsense.

I don't know about you, but I don't want to be reciting the alphabet to myself while I'm giving my woman oral pleasure! It's just not cool and I've never heard a single woman say they get off on it.

Leave that kinda crap for the comedy movies.

Now, let's discuss what really works...

You can lick your woman's clitoris from side to side or up and down.

Pretty straightforward, right?

Here's the thing though – once you find a motion (side-to-side or up-and-down), a speed of movement and an amount of pressure that your woman is responding really well too... keep doing it until she has an orgasm.

Do not constantly change what you are doing as this can cause your woman to lose the 'build up' and you'll have to start back at the beginning.

The only thing you might want to change as she builds towards her orgasm is to slightly increase the speed and pressure of your movements. But be careful with this because as I've said – if you change too much, you'll probably make her lose the feeling and you'll have to start again.

As well as simply licking your woman's clitoris from side-to-side or up-and-down – you can also try a technique where you suck her clitoris into your mouth and hum as you are sucking.

Always start out gently and gradually increase the pressure until you find a point where you are really 'getting her off.'

It sounds a little complicated but it's actually very easy to do and many women absolutely love this.

The only thing to be careful of is how hard you suck her clitoris. Always start out gently and gradually increase the pressure until you find a point where you are really 'getting her off.'

As you are sucking and humming on her clitoris, the one thing you have to be aware of is your BREATHING because it can become tricky to suck, hum and breathe at the same time!

Here's how to do it:

- **As you suck her clitoris, breathe in through your nose**
- **As you hum on her clitoris; breathe out through you nose**

Doing those two simple things means you can keep giving her pleasure, without having to pause to breathe.

Oral Sex Bonus Section: Rimming

Rimming is not for everybody.

I know many men think the idea of stimulating their woman's anus with their tongue is disgusting.

However, the FACT is that the anus has a lot of nerve endings and is a very sensitive part of the body. So even though not many women will admit (in public) to enjoying rimming – the reality is that most women love it if it's done well.

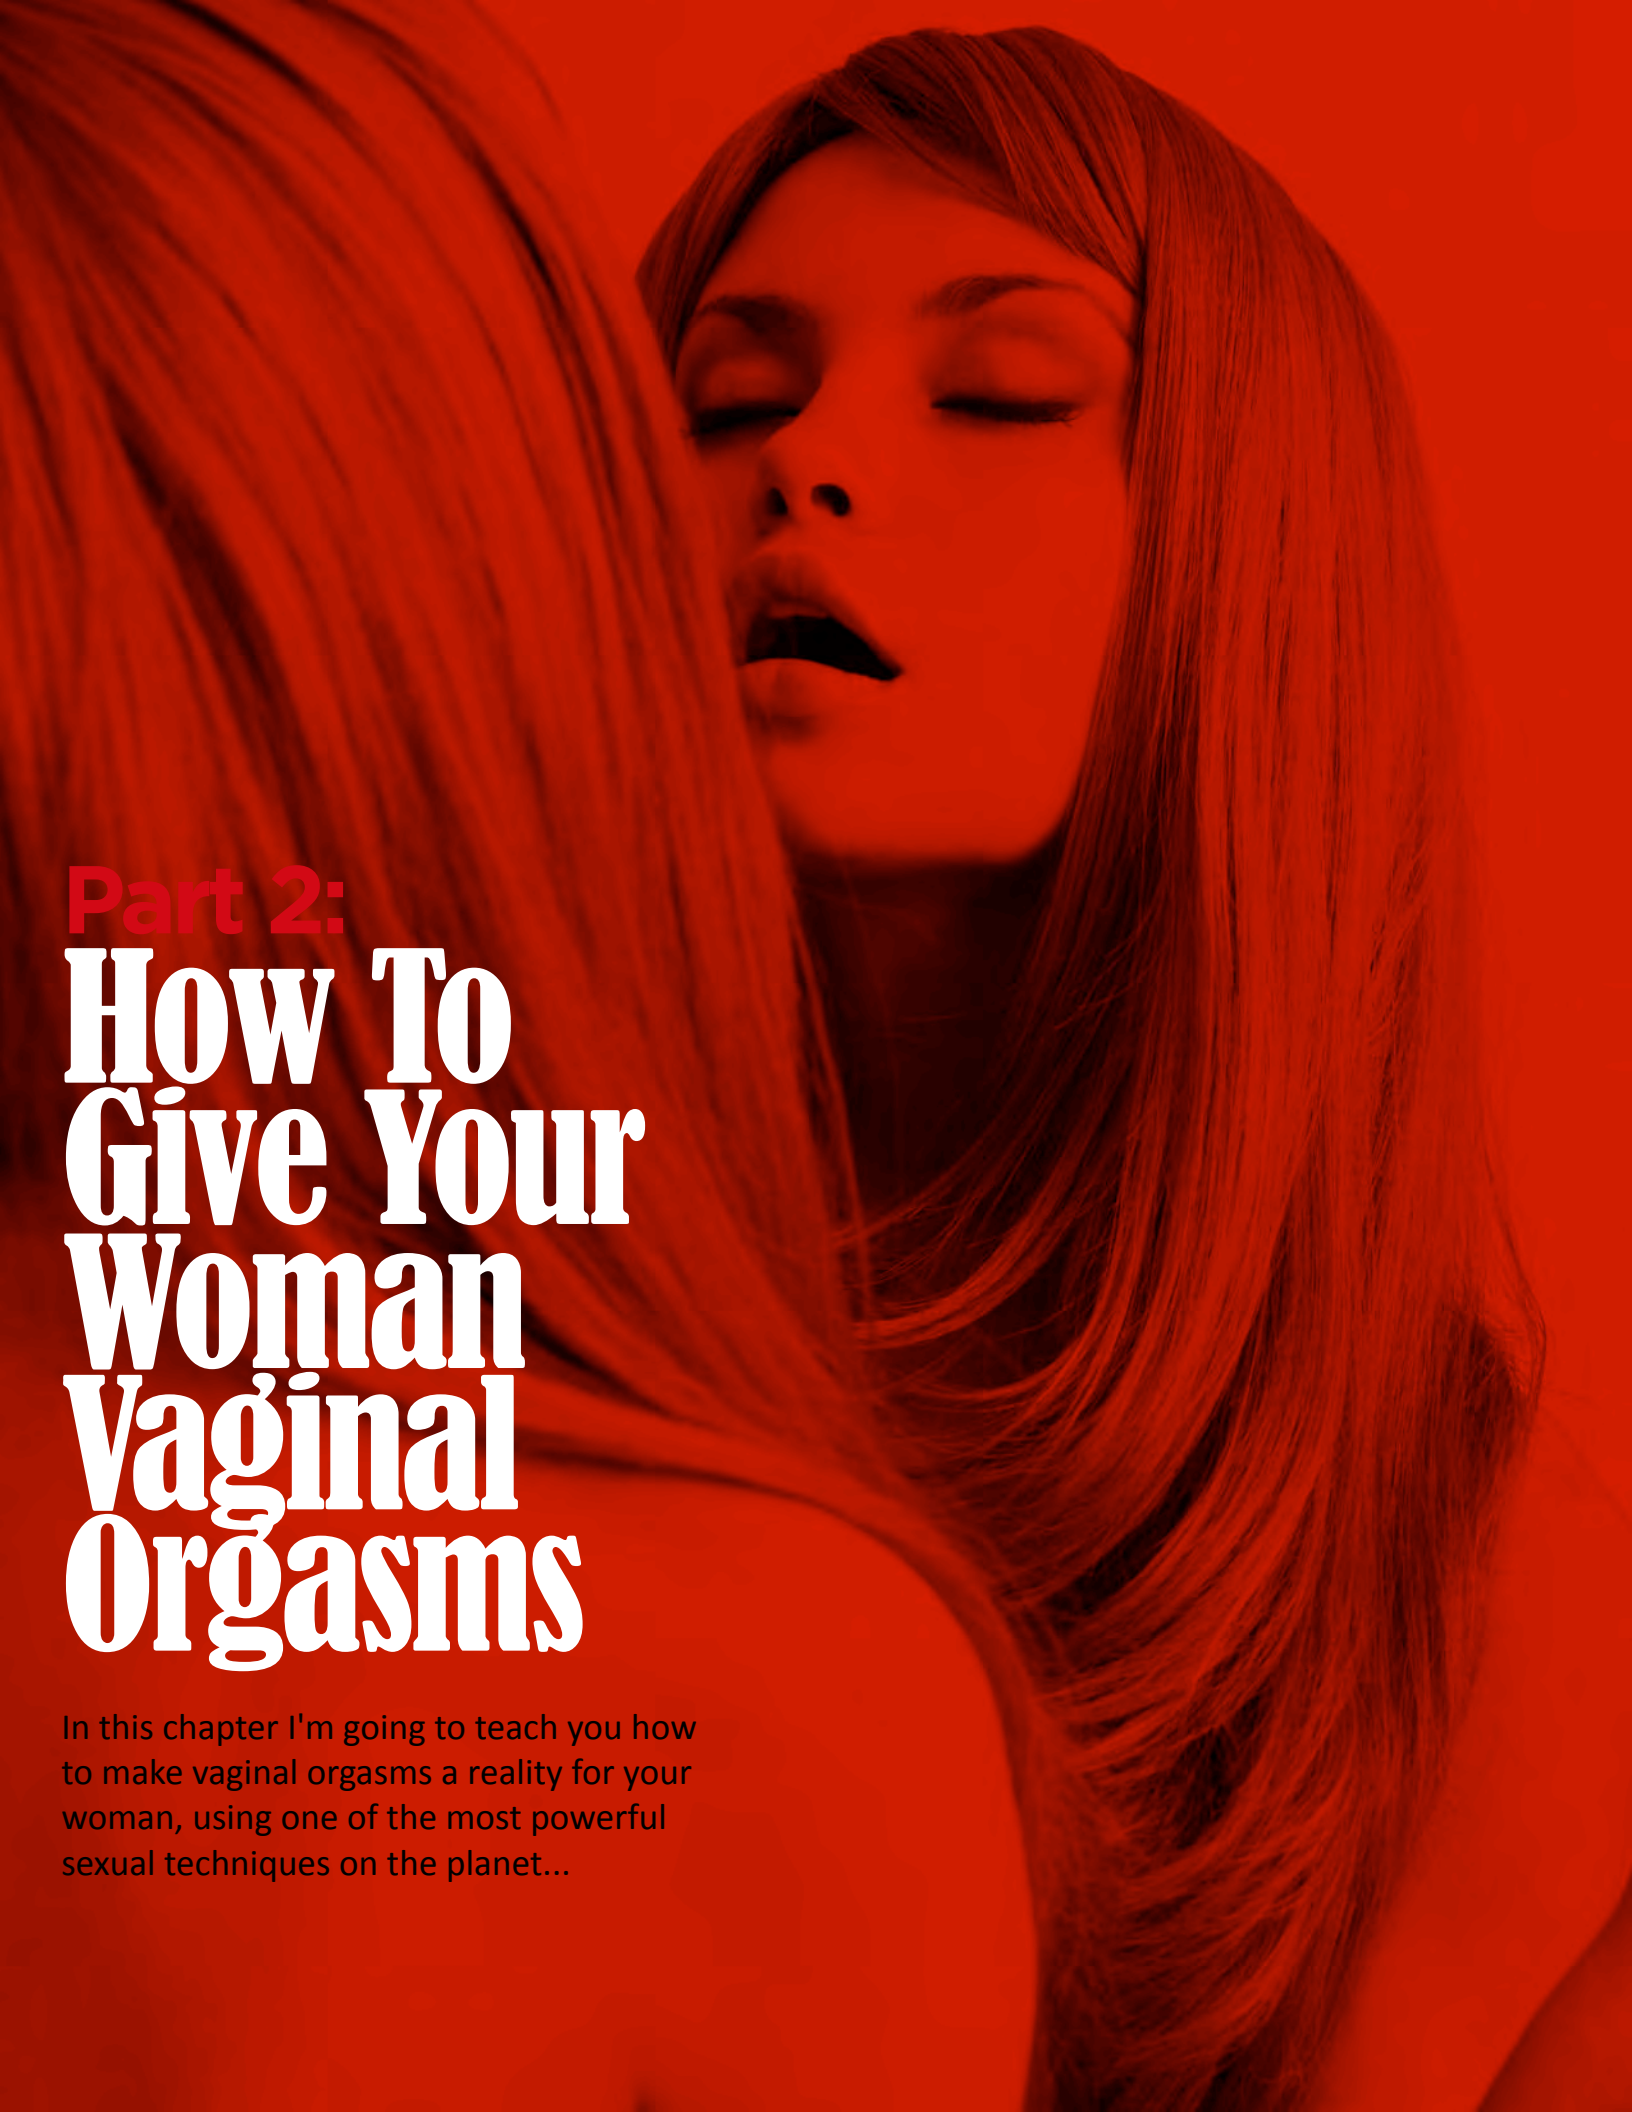

Obviously you want to choose when to rim your woman carefully. After a shower or bath is the most appropriate time.

Then it's just a case of lightly stimulating your woman's anus with your tongue. You can stimulate her clitoris with your finger as you rim her and give her a powerful orgasm.

If you keep licking her right up to the point of orgasm and carry on licking her anus during orgasm you'll not only make her come – you'll also get her to associate MASSIVE PLEASURE to you touching her ass (and you'll find out why this is so important in the section on anal orgasms).

Clitoral Orgasms: Summary

- **Clitoral Orgasms are a great way to start any sexual session**
- **After giving your woman a clitoral orgasm, her clitoris will almost certainly become 'hyper-sensitive', meaning that if you want to give her multiple orgasms – you'll need to give her other types of orgasm**
- **You can give your woman clitoral orgasms using your fingers or tongue**
- **Don't touch your woman's clitoris until you have gotten her hot, wet and really turned on**
- **Always be aware of the pressure, speed and motion of your movements as you are touching your woman's clitoris**
- **Once you find a pressure, speed and motion she enjoys – keep doing it until she has the orgasm. Don't keep changing what you are doing**

Part 2:

How To Give Your Woman Vaginal Orgasms

In this chapter I'm going to teach you how to make vaginal orgasms a reality for your woman, using one of the most powerful sexual techniques on the planet...

Part 2:

How To Give Your Woman Vaginal Orgasms

Many men and women don't even realize that vaginal orgasms exist.

Such people think that the only way to 'get a woman off' is by touching her clitoris.

Absurdly, many so-called 'sex experts' also think the same.

The reality is that due to the hyper-sensitivity that most women experience in the clitoris after having a clitoral orgasm – the majority of women are only ever going to have one clitoral orgasm per sex session.

For the record – I've only ever met one woman who was able to have regular multiple clitoral orgasms. And she still preferred **multiple vaginal orgasms**.

When a woman becomes vaginally orgasmic – it almost always becomes ridiculously easy to give women multiple orgasms. I have met women who have had 20 vaginal orgasms in an hour and routinely experience 3 to 6 of these orgasms every time they have sex.

This is all possible because the vagina does not suffer the 'hyper-sensitivity' that the clitoris does post orgasm.

Can you imagine how much more fun these women are having than the regular woman who has to put up with her man either:

- **Not making her come once**

Or...

- **Only giving her a single clitoral orgasm**

Needless to say, it's the women who become vaginally orgasmic who end up sexually addicted to the men who can give them this type of pleasure. So if you want your woman to be sexually addicted to YOU – you HAVE TO get the vaginal orgasms working.

“

Always start out gently and gradually increase the pressure until you find a point where you are really 'getting her off.'

There is no other way.

And not only are women capable of experiencing more vaginal orgasms than clitoral orgasms, they also usually say that they are much more fulfilling.

NOTE: Every woman can have a vaginal orgasm, provided she has a brain and a vagina – so no excuses.

As men, I feel it is our duty in the bedroom to give our women vaginal orgasms and that's what I'm going to teach you how to do in this section.

So pay close attention because the orgasm techniques and information that follow have the power to instantly and dramatically improve your sex-life.

Important Note Regarding Hand Care:

All of the techniques that follow involve you putting your finger(s) inside your woman. Given the sensitive areas of her body that we are talking about, it is essential that you always play by the following rules:

- **Make sure your hands are very clean**
- **Trim your finger nails short and file them so that they are very smooth. Never put a sharp/jagged finger nail inside your woman for obvious reasons**
- **Use plenty of lubrication. If in doubt, it's better to use a little more than you think as opposed to too little**
- **Never put something inside your woman's ass and then back into her vagina as this can cause her to get infections (this last point will become relevant later in the book)**
- **If you lift weights and/or do a physical/manual job, chances are that you'll have callouses on your hands. And whilst callouses are Mother Nature's way of protecting your hands – women aren't too keen on them.**

So here's what I recommend...

- **At least once a week, use a pumice stone to file down your callouses and make them as smooth as possible. The best time to do this is after a hot shower or bath, when your skin is at its softest.**

• **Then moisturize your hands. By far the best way to do this is with Organic, Raw/Virgin Coconut Oil. Regular hand moisturizing products from the supermarkets are loaded with harmful chemicals that absorb through your skin and into your body. Not what you want. So use Coconut Oil.**

[Click here to see a great Coconut Oil product](#)

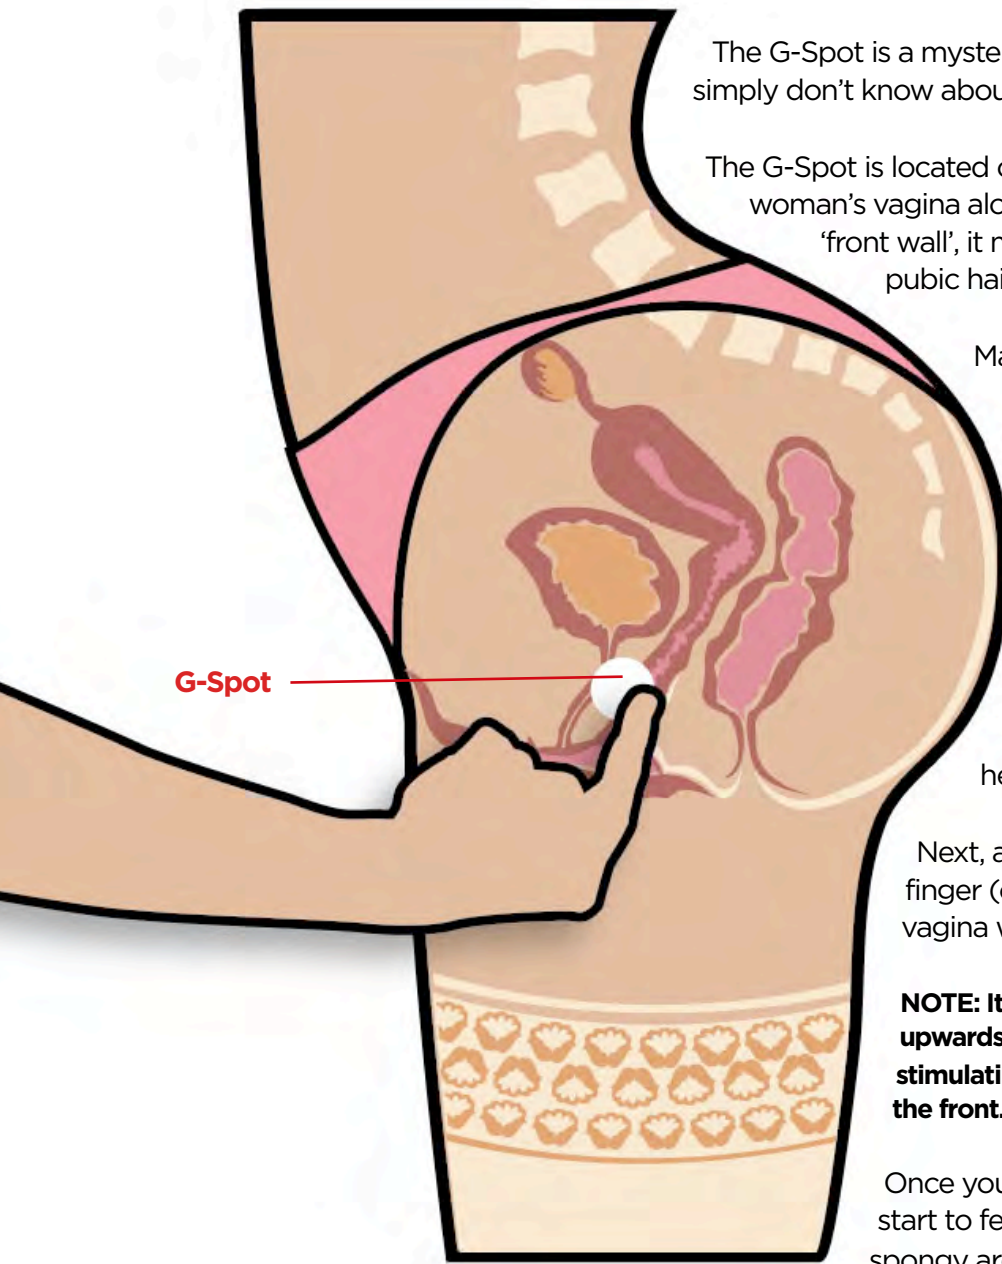

- **By the way – Coconut Oil is also great for cooking and for lubrication in the bedroom! It's highly versatile.**

With those points clear, we can move on.

The first type of vaginal orgasm we are going to look at is all to do with the G-Spot...

The G-Spot Vaginal Orgasm

The G-Spot is a mystery to most men because they either simply don't know about it or they can't find it.

The G-Spot is located centrally, just one to two inches inside a woman's vagina along the front (anterior) wall. When I say 'front wall', it means on the same side of her body as her pubic hair, not her ass.

Make sense?

Just to be on the safe side, check out this diagram.

To give your woman a G-Spot orgasm, first get her really turned on, wet and horny and then give her a clitoral orgasm to get things started.

Then have her lay flat on her back with her legs open.

Next, apply plenty of lubrication to your middle finger (of either hand) and insert it inside her vagina with your palm facing upwards.

NOTE: It's important that your palm is facing upwards because if you do the opposite you'll be stimulating the back wall of her vagina instead of the front.

Once your finger is about an inch inside her vagina, start to feel for a slightly raised, ridged, somewhat spongy area of tissue. When you find it, you've got

the G-Spot located. You'll know when you've found it because the rest of the vagina feels very smooth.

Don't be in a rush to find it because it's better that you take your time and stimulate the right area and give your woman an orgasm than it is to rush and mess it up. Remember, the G-Spot is going to be somewhere between one and two inches inside the vagina (approximately half the length of your middle finger).

Tell Your Friends

Once located, you want to apply moderate pressure, moderate speed and a 'come-hither' motion. The 'come-hither' motion basically involves curling the tip of your middle finger into your woman's G-Spot, then un-curling it, curling it and un-curling it, over and over again.

As you start to see that your woman is enjoying it, you can gradually increase the pressure. Be aware that some women enjoy A LOT of pressure when you are using this technique. It's not like touching the clitoris – where most women enjoy somewhat gentler pressure.

Chances are she'll probably start to make some noise as you are stimulating her G-Spot and then you'll know you are hitting her with a perfect amount of pressure. At this point, just keep going and she'll have a powerful vaginal orgasm.

As she nears orgasm you can increase the pressure and speed of your movements slightly, but it's not usually necessary and if you change what you are doing too much – you can throw your woman off and do more harm than good.

So that's the first type of vaginal orgasm that you can give your woman...

The G-Spot Vaginal Orgasm.

I've found that this sex technique works for many women.

In addition to the basic middle finger, 'come hither' technique I just described – you can vary it like this:

- **Use your middle finger *and* index finger (be careful with this one and always start out with just the middle finger)**
- **Use a rubbing motion instead of a 'come hither' motion. This is a fairly subtle difference because essentially both techniques involve applying moderate to very firm pressure on the g-spot. But this variation is worth keeping in mind because I have found some women respond better to it than the standard 'come hither' motion**

With all that said, I'm now going to share an even more powerful sexual technique with you that I've found works for virtually every emotionally healthy woman.

It's called **The A-Spot Method** and if you do it right – you should end up giving your woman the most powerful vaginal orgasms she'll ever likely experience. Knowing this technique really separates the men from the boys. So read on carefully and be sure to try this out with your woman as soon as possible.

It's a definite 'winner'...

The A-Spot Method

The A-Spot Method is my 'go to' sex technique.

I've used it to give many women their first ever vaginal orgasm. I've had women cry tears of joy after such an experience. Vaginal orgasms are truly life-changing for a woman.

To say this technique is a 'game changer' is an understatement comparable with saying Tiger Woods is 'quite good at Golf', Warren Buffett knows 'a fair bit about making money' and that Bill Gates is 'fairly successful.'

You get the idea.

Make no mistake – despite the A-Spot method sounding very simple... it is devastatingly powerful and yet I've never once seen it mentioned in 'mainstream' sex advice.

Crazy, eh?

Anyway, in all probability, when you use this technique on any woman – chances are that no previous man will have used it on her and therefore... you'll totally blow her mind.

Making a woman say 'You're the best I've ever had' becomes remarkably easy to pull-off once you use the A-Spot method.

I think you get the message – this technique is THE REAL DEAL.

Are you excited yet?

You should be.

Here's how it's done...

Have your woman lay on her back with her legs open.

Now insert your very well lubricated middle finger (of either hand) inside her vagina with your palm facing up.

Instead of going 1 to 2 inches in (like you would to give her a G-Spot orgasm), this time penetrate her as DEEPLY as you can.

Seriously, no matter what your finger length, push that baby in as far as you can.

Then stimulate that area using the same 'come-hither' motion that you would use to give your woman a G-Spot orgasm.

Most women respond favorably to firm or very firm pressure on the A-Spot and will make A LOT OF NOISE when you are doing it right.

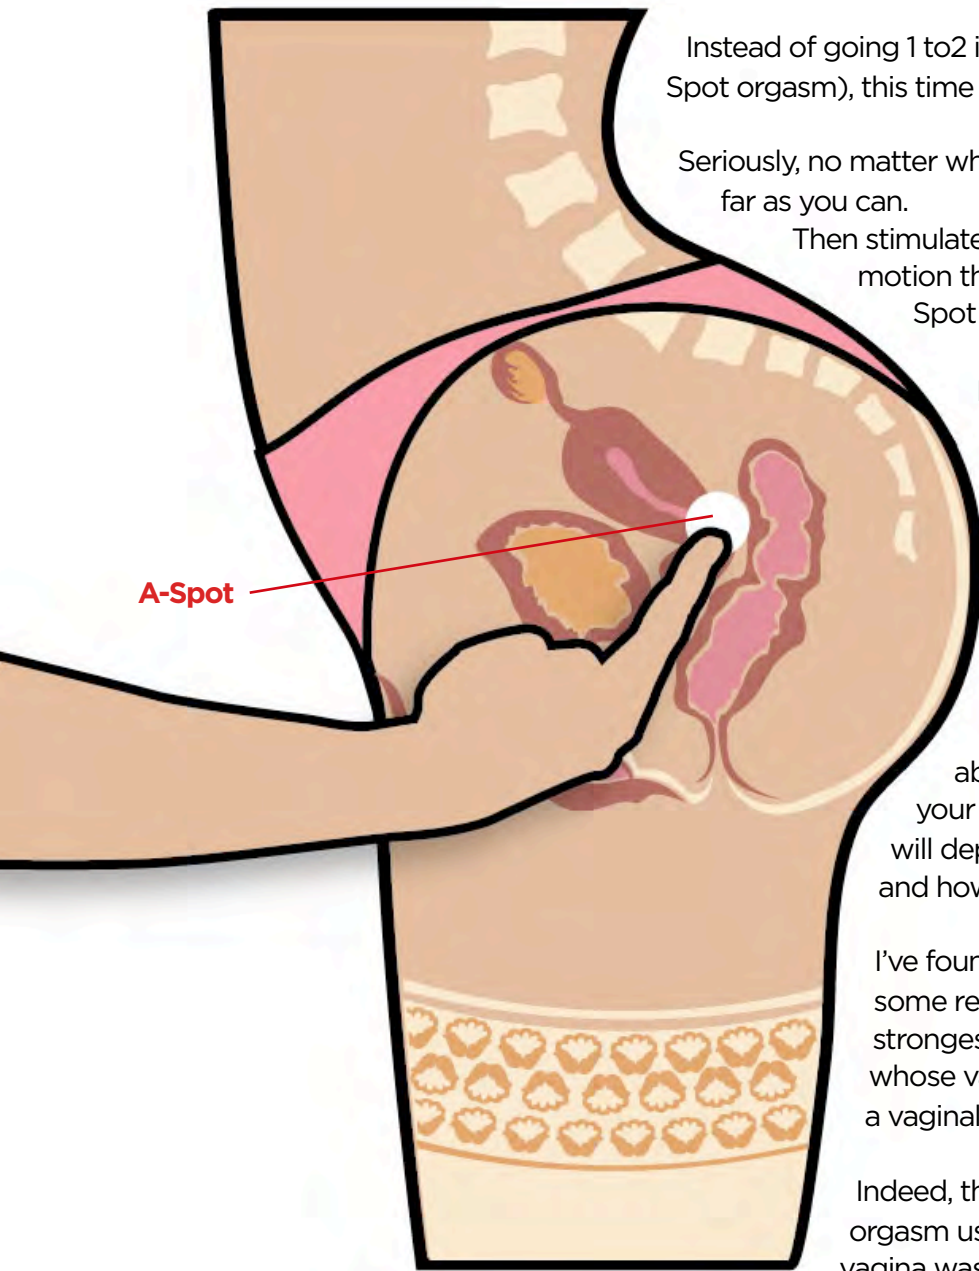

Once you find that pressure, keep going until your woman has a powerful **A-Spot Vaginal Orgasm**.

As she reaches her climax you should be able to feel her vaginal walls contract around your finger. The strength of those contractions will depend on how strong her vaginal walls are and how powerful that particular orgasm is.

I've found that physically fit, active girls who do some regular anaerobic exercise tend to have the strongest vaginal muscles and it's these women whose vaginas contract the hardest when they have a vaginal orgasm.

Indeed, the very first time I gave a woman a vaginal orgasm using The A-Spot Method I thought her vagina was going to rip my finger off. Seriously, those were some damn powerful contractions.

Needless to say - she was a very fit and active girl who hit the gym several times a week.

So that's the A-Spot method...

Middle finger inside your woman's vagina as deeply as it'll go, then use a 'come hither' motion to stimulate her front wall using lots of pressure

You can also experiment with using two fingers at once (but always start out with one) and you can also try a rubbing motion instead of a 'come hither' motion.

Whatever you do, prepare for your wrist and hand to get tired, especially if you give your woman several A-Spot orgasms one after another (which you'll find is pretty easy to do once you begin using the technique).

However, being A REAL MAN - you won't even think about stopping because your wrist and hand are tired, will you? My advice is to ignore your pain because:

It's only temporary

And...

Your woman's screams and orgasms are more than worth it, right?

Variations Of The A-Spot Method

In this section, I'm going to share a variation of the A-Spot method with you that for some women is even more powerful than the standard technique I taught you in the previous section.

With that said, some women don't respond favorably to it at all, so always be in tune with your woman's 'sexual signals' when you are experimenting with a new technique.

Remember - the goal is to give your woman incredible sexual pleasure, not to blindly use any and every sex technique you read about. A great lover knows that every woman is different and that must always be taken into consideration in the bedroom. With that said, here's the technique:

Instead of penetrating your woman's vagina as deeply as you can and stimulating her front wall with your middle finger, for this technique you stimulate the BACK WALL of her vagina.

This is the best way to do it:

- **Have your woman assume the 'doggy-style' position (get her on her hands and knees with her back arched and her butt in the air. If she wants, she can rest on her forearms, instead of her hands)**
- **Now insert your middle finger into her vagina as deeply as you can with your palm facing upwards**
- **You are now in position to stimulate her back wall**
- **Use the same 'come hither' motion and if she likes it - use a lot of pressure and proceed to orgasm (for many women, this technique produces a similar feeling to having anal sex because you are applying pressure to the thin wall that separates her vagina and anus)**

The only drawback to this variation of the A-Spot method is that some women like an area stimulated that is further in than you are likely to reach with your middle finger (but more on that in the next section).

A Third Variation Of The A-Spot Method

A third variation of The A-Spot Method is to use the original method, but with your woman in the doggy-style position instead of flat on her back. So you still stimulate the FRONT WALL of her vagina with your middle finger in as far as it will go and using a 'come hither' motion – but you do it with her on all fours.

For some women, this third variation is the most powerful. Try talking dirty to her and spanking her as you do it and you may very well see what I mean.

My advice to you is to try all the variations of the A-Spot method and find which one works best for your woman. You'll more than likely find she likes all three – so switch them up and don't always do the same thing.

Doing the exact same thing over and over again in the bedroom is a recipe for predictability and ultimately - boredom. And when a woman finds the sex boring – she'll stop wanting it. Period.

Then she might look elsewhere and CHEAT.

Ouch.

The secret is to do something different every time you 'get it on' with your woman. That way, things stay interesting and exciting and never become boring and predictable.

Now let's move on and take a look at...

The One Sex Toy You Might Want To Use

Remember the second variation of The A-Spot Method that I told you about... The one where you stimulate the BACK WALL of her vagina?

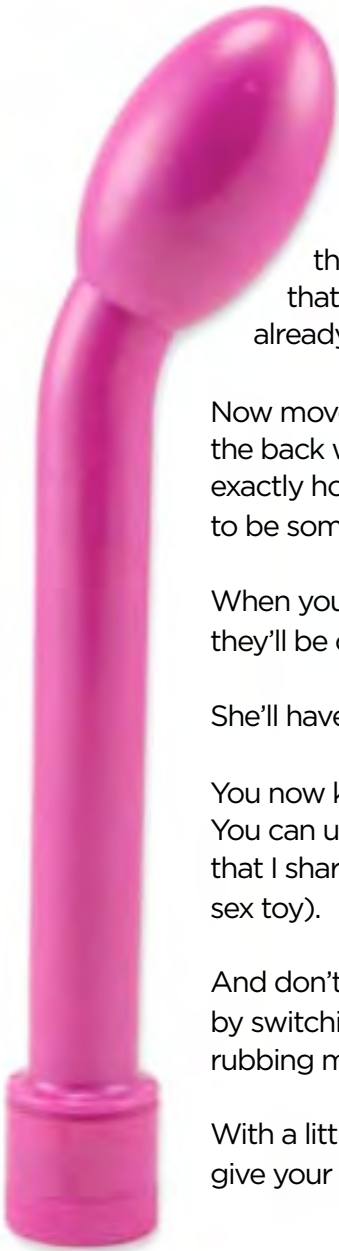

Well, if you can't get in deep enough with your finger – there is a SEX TOY that can get the job done.

Now, don't race out to buy that overly large and thick dildo like most guys do.

No, no, no...

What you want is a fairly long and thin dildo with a curved tip.

A dildo five, six or seven inches long, but only one or one and a half inches thick should do the job.

Here's how you use it...

Have your woman get on all fours and then insert the dildo inside her with the curved end facing the back wall of her vagina. (It goes without saying that the dildo must be well lubricated, regardless of how wet your woman already is).

Now move the dildo up and down (not in and out) so that the curved end goes into the back wall of her vagina over and over again. You'll have to experiment to find out exactly how far in produces the best results, but suffice to say – it's probably going to be somewhere a little further in than you could get your middle finger.

When you find the right spot and apply a pressure your woman responds well too – they'll be only one outcome...

She'll have a powerful vaginal orgasm.

You now know several powerful techniques for giving your woman vaginal orgasms. You can use the G-spot Technique and the four variations of The A-Spot Method that I shared with you (three requiring the use of your fingers and one the use of the sex toy).

And don't forget – you can tweak the fingering techniques that I've shared with you by switching from one finger to two and changing from a 'come hither' motion to a rubbing motion.

With a little thought and imagination you can come up with many different ways to give your woman vaginal orgasms.

This is the perfect style of dildo for giving your woman vaginal orgasms. You can buy it [here...](#)

Here's a chart to help you out:

And remember – vaginal orgasms have five HUGE benefits over clitoral orgasms: Almost every woman finds them more powerful than clitoral orgasms

They are the key to giving your woman MULTIPLE orgasms because post-orgasm, the vagina does not become hyper-sensitive, unlike the clitoris

Most women have never had a vaginal orgasm, so when you give your woman her first – she'll think you're a SEX GOD

Few women can give themselves vaginal orgasms, so when you give your woman vaginal orgasms, she'll think of you as 'indispensable' in the bedroom

They pave the way for the most powerful orgasms of all – ANAL orgasms (more on this later)

Right now, I'm going to share a powerful technique with you that combines G-Spot and clitoral stimulation to give your

woman a unique type of orgasm that I call a **Combination Orgasm...**

The Combination Orgasm

As you probably guessed from the title, The Combination Orgasm involves stimulating your woman's G-Spot and clitoris at the same time.

Here's how you do it:

- **Have her lie back with her legs open**
- **Then lie in between her legs and start to lick her clitoris**
- **Next, as she gets really into it – insert your middle finger into her vagina and start to stimulate her G-Spot using the 'come hither' motion**

NOTE: you can also vary the technique by starting off with G-Spot (or A-Spot) stimulation and then adding clitoral stimulation.

Not surprisingly, the results are powerful and you can expect your woman to come very hard when you give her this type of sexual pleasure.

One important thing to remember is to get both sex techniques working separately before you progress to combining them.

The reason why I say this is because you want to make sure you are giving your woman vaginal orgasms. To do this you must use the G-Spot (or A-Spot Method).

If you lick her clitoris and massage her G-Spot having never given her a vaginal orgasm before, you will probably end up just giving her a clitoral orgasm while you have your fingers inside her.

That's why I placed The Combination Orgasm after clitoral and vaginal orgasms in the 'Ultimate Orgasm Techniques' program...

Because it's a more advanced technique.

Get the basics working and then feel free to try The Combination Orgasm technique out with your woman – she'll absolutely love it. I promise.

Now that you know how to 'get your woman off' using several powerful ORAL and FINGERING techniques, let's take your 'bedroom game' to the next level and talk about **vaginal orgasms during intercourse...**

Vaginal Orgasms During Intercourse

When you give your woman regular vaginal orgasms using G-Spot or A-Spot fingering techniques – she will be incredibly impressed. There’s no two ways about it – she’ll think you’re ‘the man.’

However, simply giving your woman mind-blowing orgasms is NOT the end of the journey. It’s not sexual MASTERY.

It’s very good, but it’s not yet great.

Here’s why...

***Simply giving
your woman mind-
blowing orgasms
is NOT the end
of the journey.
It’s not sexual
MASTERY.***

Let’s say you start off a sexual session by giving your woman a clitoral orgasm and you do so by giving her OUTSTANDING oral sex.

Then you give her two A-Spot orgasms using your fingers.

Then you have intercourse and you come but she doesn’t.

QUESTION: Which was more pleasurable for her – the foreplay or the intercourse?

If you said ‘the foreplay’ – you answered correctly.

Makes sense, *right?*

After-all, you ‘got her off’ three times before you penetrated her with your ‘tool’ but zero times during intercourse.

Now here’s the thing...

Ideally you want to take your woman on sexual adventures where they start off really well and end **brilliantly**.

But in the above example it started off really well (because you gave her three orgasms during foreplay) but then things didn’t progress because you had intercourse with her and didn’t make her come once.

Can you see how this works?

Don’t get me wrong – to give your woman three orgasms during foreplay is AWESOME. It’s way way better than the average guy will ever do.

But if you want to totally blow your woman’s mind and give her the kind of sex that makes her brag to her friends about how great you are in bed and makes her wet

just thinking about you – you have to live up to the high standard you set during foreplay.

Said differently, if you give your woman orgasms during foreplay – you really should be looking to follow that up during intercourse.

As we previously said, you don't want to rely on rubbing your woman's clitoris to 'get her off' during intercourse.

I mean think about it – is it really that satisfying to have to rub her clitoris while you do her from behind?

I don't think so.

Not compared to the alternative anyway...

The alternative being to thrust in and out of her from behind and make her orgasm without touching her clitoris. **That's an example of a vaginal orgasm during intercourse.**

The question is:

"How do you make those vaginal orgasms during intercourse happen?"

Well, the answer involves me sharing a SEXUAL SECRET with you...

And the sexual secret is that when you give your women vaginal orgasms using the A-Spot method, you start to 'awaken' her vagina.

Now, what the hell do I mean when I say that you 'awaken' her vagina?

Well, when I say that you 'awaken' her vagina I mean you make her FEEL MORE. Basically, her vagina becomes more sensitive.

Can you see where this is going?

Yep, you got it...

Once she feels a lot more sensitivity in her vagina, she starts to feel a lot more sensation during intercourse.

BINGO.

Now it's relatively easy to make your woman have vaginal orgasms during intercourse. The truth is that the A-Spot method did most of the work for you.

Pretty damn cool.

With that said, there are some other sex techniques you can use to make it even easier to give your woman vaginal orgasms during intercourse.

For starters, you must know your sexual positions and think about where your woman's most sensitive areas are inside her vagina.

For example, if you take a thin pillow and place it under your woman's lower back in the missionary position – you make it easier to stimulate her G-Spot and A-Spot during intercourse.

The end result – it's a great sex position for giving your woman vaginal orgasms during intercourse.

IMPORTANT NOTE: who said size matters? The G-Spot is only one to two inches inside your woman and the A-Spot can be reached with your middle finger! Clearly, size isn't an issue once you get vaginal orgasms working.

Another example of a great sex position is doggy-style. This is especially true if your woman likes the variation of the A-Spot method where you stimulate the BACK WALL of her vagina. And if your erection curves slightly upwards as well – you will find this a very rewarding position for 'getting your woman off' during intercourse.

The bottom line is that once you can give your woman vaginal orgasms using one of the fingering techniques previously described, giving her vaginal orgasms during intercourse becomes fairly easy.

In fact, some women become so sensitive after being exposed to the A-Spot method several times – they can come with only the smallest amount of penetration. I dated one woman who would come 9 times out of 10 almost immediately as soon as I put my ‘tool’ inside her.

And the best part of that was – she’d never had a vaginal orgasm before she met me. Then, within a couple of weeks of using the A-Spot method, she started experiencing clitoral orgasms, A-Spot orgasms, multiple orgasms and she became a squirter too.

Within a couple of weeks of using the A-Spot method, she started experiencing clitoral orgasms, A-Spot orgasms, multiple orgasms and she became a squirter too.

And none of this happened because I have any kind of super human powers. Just sound sexual beliefs, a strong ‘bedroom personality’ and good knowledge of female anatomy and the sex techniques I’m sharing with you here.

Compare what you’ve just learned to the average man who endlessly pounds away at his woman and doesn’t make her come. Or she rubs her clitoris to ‘get herself off’, or he rubs it for her.

Whichever way you look at it, it’s pretty darn obvious... vaginal orgasms are where the party is at.

With all that said, there is something else I have to share with you about vaginal orgasms during intercourse and it’s called **Taoist Thrusting...**

Taoist Thrusting

Taoist Thrusting is an ancient sexual technique for increasing your woman's pleasure during intercourse and ultimately – giving her vaginal orgasms.

As an added bonus – Taoist Thrusting is also a great way to help you LAST LONGER.

This might be one of the coolest sex techniques ever – it helps you to ‘get your woman off’ and makes it easier for you to last longer.

Nice :)

Taoist Thrusting requires a specific combination of short and deep strokes that looks like this:

- **Start off with 9 short strokes, followed by 1 deep stroke**
- **Then 8 short strokes, followed by 2 deep stroke**
- **Then 7 short, 3 deep**
- **6 short, 4 deep**
- **5 short, 5 deep**
- **4 short, 6 deep**
- **3 short, 7 deep**
- **2 short, 8 deep**
- **1 short, 9 deep**

At this point you've completed one cycle and you then start over with 9 short and 1 deep, 8 short, 2 deep and so on.

Taoist Thrusting is pretty straight-forwards and incredibly effective.

Here are a few things to keep in mind when using this technique:

- **The short strokes should be 1 to 2 inches inside your woman's vagina (perfect for hitting her G-Spot)**
- **On the deep strokes you can go ‘all the way in’**
- **The strokes do not need to be fast – just aim to keep a steady rhythm**

- **Don't let your penis come out of your woman on the short strokes because this reduces her pleasure and will increase the time it takes you to make her orgasm**

Finally, don't count out loud!

You might think that sounds ridiculous but I told a close friend about this technique and he said it didn't work.

Knowing this technique DOES work I delved a little deeper by asking him some probing questions and it turned out he'd been 'counting his strokes' out loud.

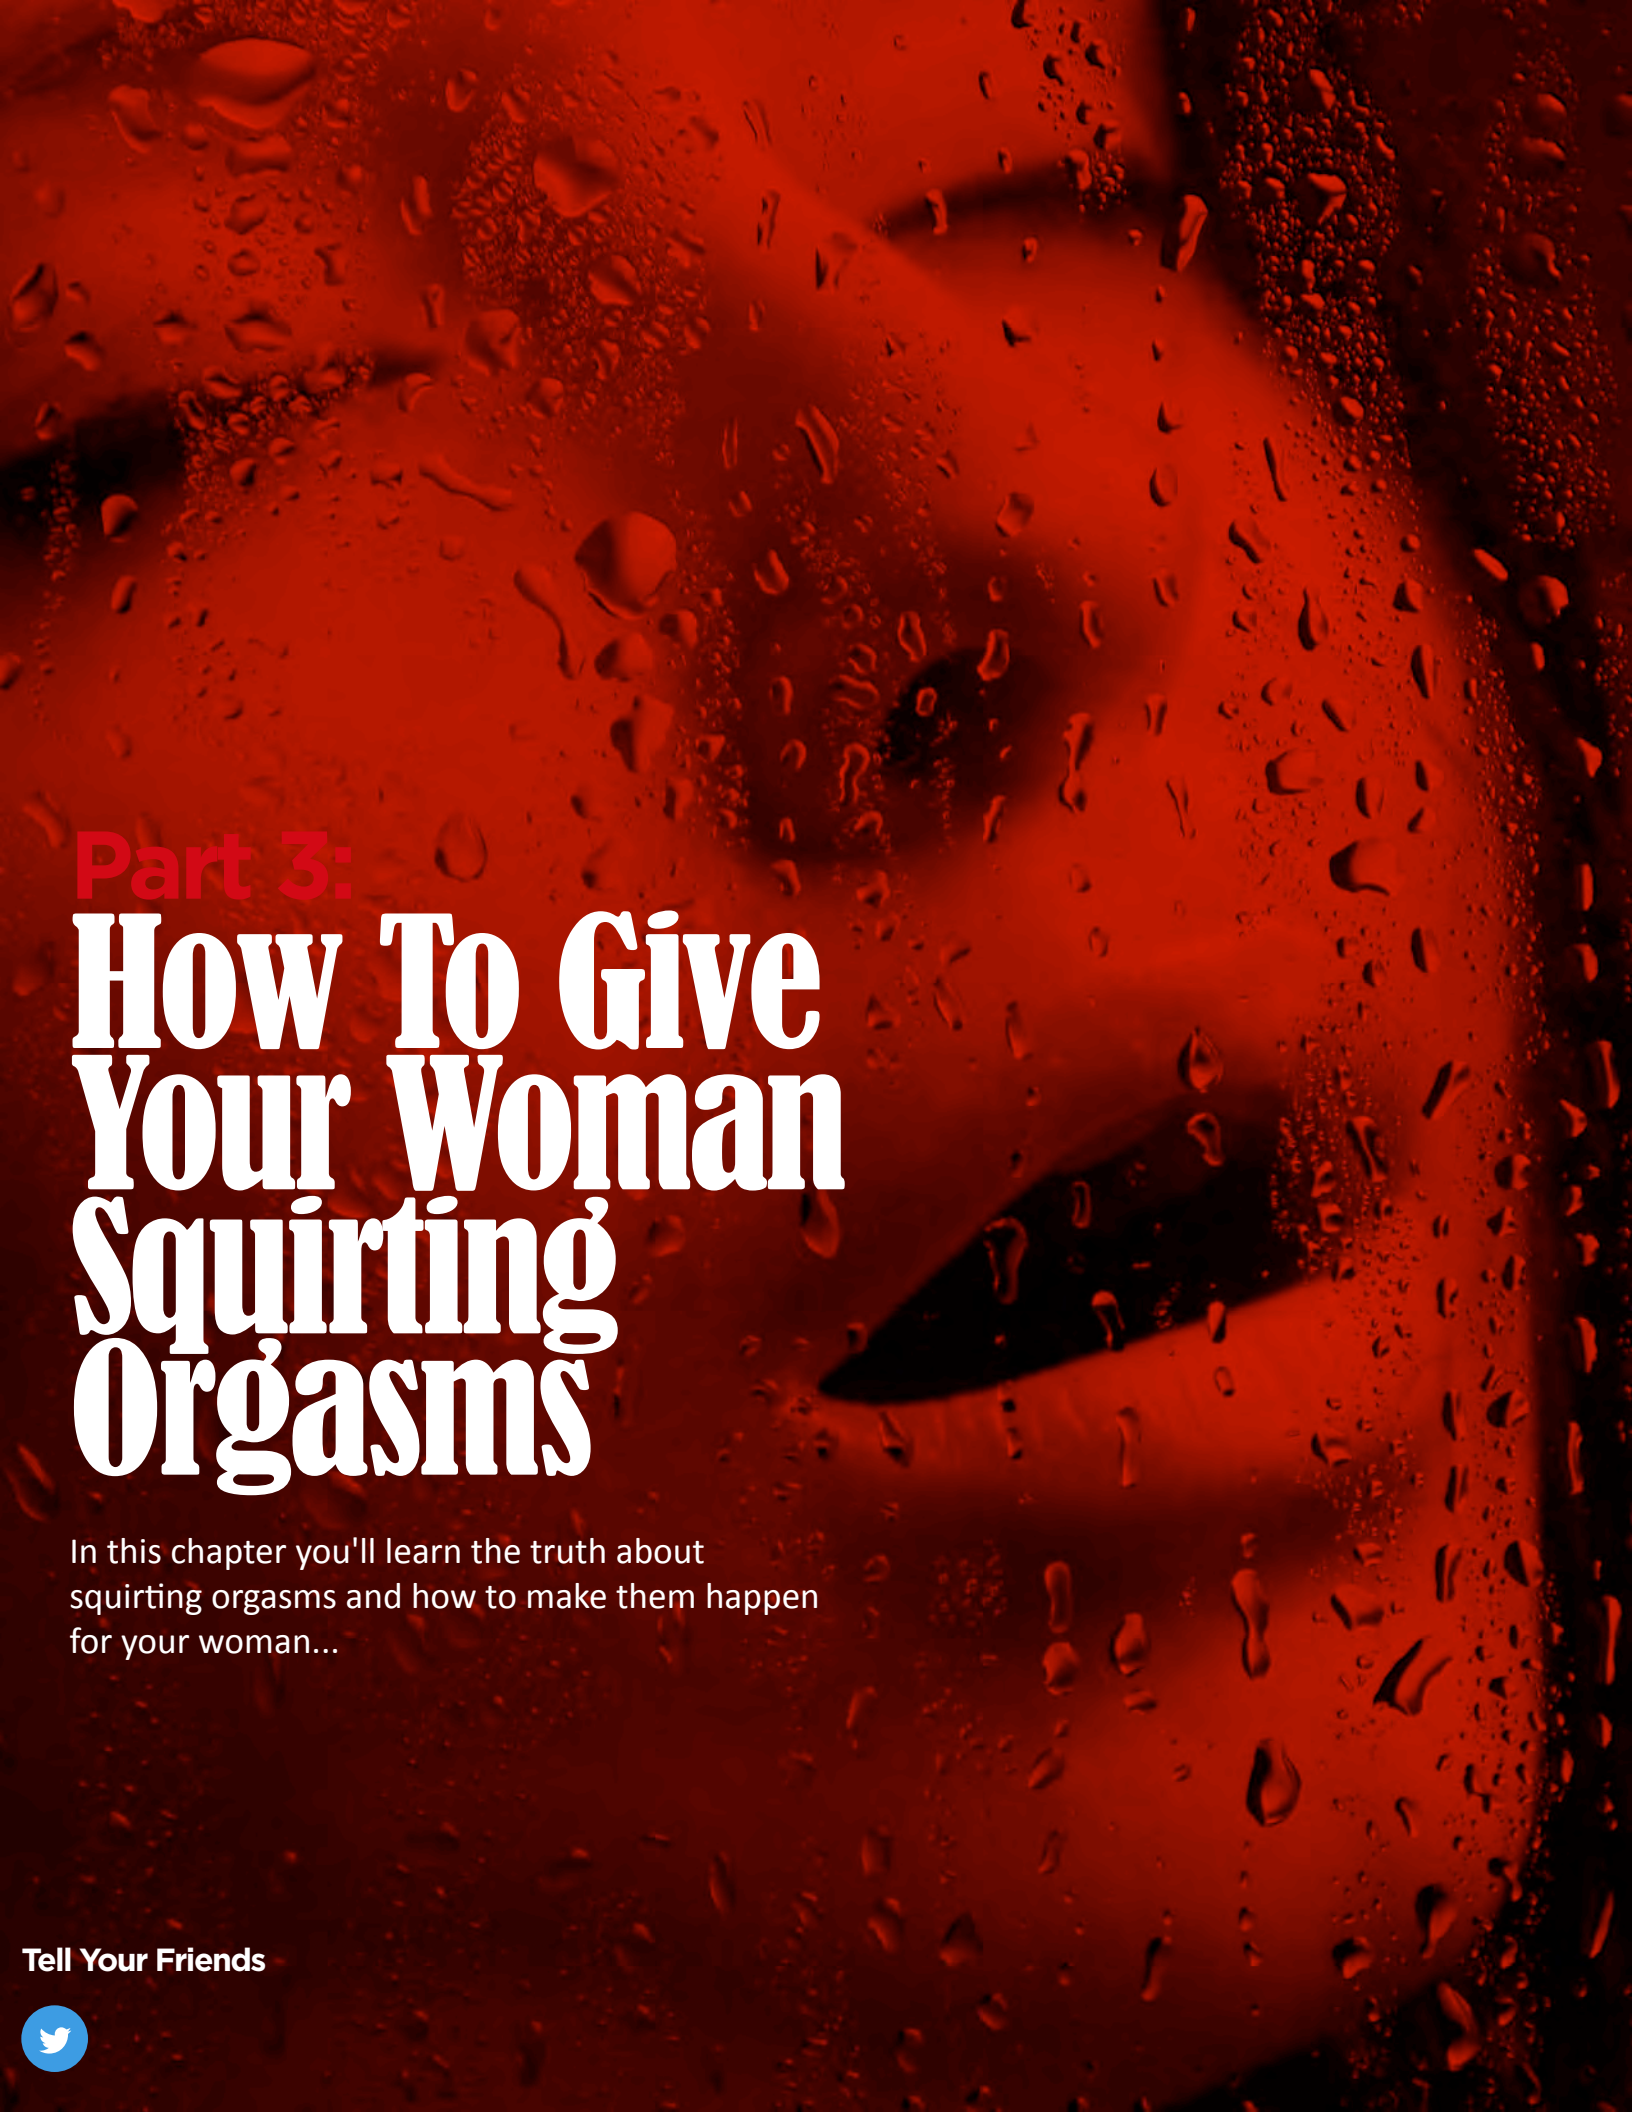

Needless to say - his girlfriend was not very impressed.

Listen up.

It doesn't matter if you accidentally do 8 short strokes when it should have been 9 or 2 deep when it should have been 1. Just try to stick to the pattern and for God's sake don't count out loud.

That story still cracks me up.

The next thing we are going to talk about is one of my favourite topics concerning female sexual pleasure – **Squirting Orgasms...**

Part 3: How To Give Your Woman Squirting Orgasms

In this chapter you'll learn the truth about squirting orgasms and how to make them happen for your woman...

Tell Your Friends

Part 3:

How To Give Your Woman Squirting Orgasms

FACT: Women can squirt.

In other words, they can have orgasms where they EJACULATE.

But you don't just have to take my word for it. Consider this email I recently received from a very happy reader called Joe:

Hi Adam, my girlfriend had never had an orgasm before yesterday. So I took your advice to the bedroom last night and she had her first vaginal squirting orgasm... She was in a little shock so I didn't react too over the top and wasn't sure what to think. So I didn't try again. Tonight on the other hand we went for it and she had not one but seventeen squirting full vaginal orgasms!

It was fantastic for both of us...

You are a legend, thank you so much. You added a whole new flavor to my 5 year old relationship. Thanks for my new found joy I'm so happy and so is my girlfriend!

Joe

Many men do not like the idea of female ejaculation or simply refuse to believe it exists. I believe that such men do not really like women. Sure, they may want to have sex with women, but it's for purely selfish reasons.

Men who are not interested in making their women squirt do not really have any meaningful desire to give their women great sex.

Now let's bust a myth about female sexuality relating to 'squirting'... When a woman ejaculates, it is NOT urine (contrary to what many men and some women who are new to squirting believe).

Let me repeat that because it's very important – when a woman ejaculates, there is no urine in that fluid.

So the question is:

“What is the liquid a woman can ejaculate when she orgasms?”

The answer is that it is clear, water like liquid that comes from her Skene glands. The fact of the matter is that it is physiologically impossible for a woman to urinate when she is highly aroused. This is in much the same way that it is impossible for a man to urinate when he has an erection.

Now, there is an obstacle that you will more than likely have to overcome if you want your woman to have squirting orgasms. The obstacle is all to do with the fact that when she is about to squirt, she will feel the need to PEE.

Boom.

At this point, virtually every woman will prevent herself from squirting. In her mind, she is of course - preventing herself from urinating.

So the next question is:

“How do you get her to overcome this fear of urinating and get her to squirt?”

The answer is that there are a few things you need to do:

Always get your woman to go to the bathroom and empty her bladder before you have sex. This way she'll be more relaxed

Next, explain to your woman that when she feels that need to pee just before she has an orgasm, she is in fact feeling the need to ejaculate. Tell her that she is preventing herself from squirting. I do not advise you to have this conversation during sex because your woman is running totally on 'emotion' during sex and is not thinking 'logically.' So talk to her about it at a time when you are not 'getting it on'

What you must get her to do when she feels the urge to squirt during sex is to 'push the feeling out.' When I say that you must tell her to 'to push the feeling out', I mean that she must relax her PC Muscles (the muscles that she uses to stop herself going to the toilet). These same PC Muscles that stop her peeing are the ones that stop her ejaculating during sex. So you must get her to relax those PC Muscles and push

The reality is that you and your woman may not be successful straight away, but just keep reassuring her that it is perfectly natural to squirt and that when she does - her sexual pleasure and the power of her orgasms will greatly increase.

Also be aware that once she learns to squirt, she won't forget how and it'll become easier and easier for her to do.

The first time your woman squirts, it may only be a small amount of liquid, but this may increase as she learns to 'push the feeling out.' Some women only ever squirt a little, but I have known women who can squirt the entire length of the bed!

It's pretty incredible when that happens.

This leads us to another point of interest...

Many women are worried about making the bed all wet. If your woman expresses this concern to you, you must make sure she knows that you'll find it exciting and that it's ok for her to make the bed wet. (You can also try putting a towel down to absorb the moisture. This tactic makes it much easier for many women to relax, push and squirt).

The best techniques for giving your woman her first squirting orgasm are the G-Spot and A-Spot techniques I have previously talked to you about.

You can experiment with both and as you do - be aware that you should talk your woman through the entire experience and lead her at all times.

Even if you've never made a woman squirt before, act with confidence and don't let anything phase you - this way your woman will take you seriously and follow what you tell her to do.

Here's an example of how you can go about trying to give your woman a squirting orgasm...

Have her empty her bladder before you do anything.

Then take her to the bedroom, get her sexually aroused, wet and horny and give her a clitoral orgasm.

Next, have her lie on her back and then start to stimulate her A-Spot. Tell her that you are going to make her squirt.

Ask her to tell you when she starts to feel the urge to pee.

Then guide her through the squirting orgasm. Speak clearly, slightly deeper than usual and with authority...

YOU: "Baby, you are going to squirt for me"

HER: "I think I'm going to pee"

YOU: "You're not going to pee, you're going to squirt"

YOU: "Push the feeling out"

HER: "Okay I will"

YOU: "Relax and push"

And you just keep going like this until she has a squirting orgasm.

I cannot emphasize enough the point that you must be in control, DOMINANT and believable because this is the only way that you'll get your woman to fully trust you and follow your lead.

Remember, in her mind (until you told her otherwise), she'd spent a long time (probably years) thinking that this feeling of being about to squirt was a need to pee. She'd also probably associated preventing this feeling with preventing a very embarrassing situation. After-all, she thought that by stopping the feeling coming out she was stopping herself from peeing during sex.

She had no idea that she was in fact preventing herself from experiencing **incredible squirting vaginal orgasms**.

Furthermore, she's probably discussed this situation with her girlfriends (most, if not all of whom won't have ever squirted) and they'll all have agreed that they felt the urge to 'pee' during sex and had to regularly prevent it.

Of course, you now know that your woman and her girlfriends have, for years, been stopping themselves from ejaculating and preventing themselves from experiencing truly mind-blowing squirting vaginal orgasms.

The interesting thing is that many women can have an orgasm from the G-Spot and A-Spot methods and still prevent the squirting from happening, whereas some women will simply not respond well to the techniques and they'll have no kind of vaginal orgasm whatsoever.

It is my experience that every emotionally healthy woman will have powerful vaginal orgasms if you use the techniques as described. Then you just have to train her to squirt.

NOTE: some women will just embrace the idea of squirting and they'll 'let go and push' without you having to say anything. But such women are rare.

In contrast, the women who respond badly to the A-Spot technique are almost always women who have some kind of emotional issue going on and a lack of self-esteem. Until these women sort out their emotional issues they are unlikely to experience vaginal orgasms.

There is just one more thing that you need to know regarding squirting orgasms and that thing is **Kegel Exercises...**

Kegel Exercises

Kegel exercises will strengthen your woman's PC muscles and increase her ability to squirt.

When I say 'increase her ability to squirt', I mean she'll ejaculate more fluid and push it further. And usually, the more fluid she ejaculates, the more pleasurable she will find the orgasm.

You have to emphasize the fact that Kegel exercises will result in more pleasurable orgasms for your woman, otherwise she won't do them regularly.

Here's how to do them:

First, explain to your woman that the PC muscles are the muscles that she uses to stop herself peeing.

Then get her to isolate those muscles. In other words, get her to tense the muscles she would tense to stop herself peeing – without tensing any other muscles.

Then get her to relax those muscles completely.

The best way to get her to tense and relax her PC muscles is to have her do so when she has a full bladder and goes to pee. To stop her pee mid-blow she'll have to contract her PC muscles. To start peeing again – she'll have to relax them.

Bingo.

You just taught her how to control these important muscles in just a few seconds. Once she has control, she can begin doing Kegel exercises on a daily basis.

NOTE: She doesn't need to do them whilst on the toilet. She can in fact practice her Kegel Exercises anywhere.

When she starts begins practising, she can begin with a 3 second contraction of her PC muscles, followed by a 3 second relaxation of those muscles. Then she can do 4 more repetitions.

That's 1 set of 5 reps.

I'd get her to do just that each day, on week one. Then progress to 2 sets of 5 reps on week two and 3 sets of 5 reps on week three.

From here, the progression is to hold the muscle contractions for longer.

So go 5 second contractions, followed by 5 second relaxations.

So now week four looks like this:

3 sets of 5 reps (each rep lasting 5 seconds, followed by 5 seconds of relaxation)
By this point you should notice big increases in the amount of fluid your woman can squirt. She can progress with the exercises until she can hold the muscles for 10 seconds, followed by 10 seconds of relaxation and do 10 reps per set.

So ultimately, she could do the following Kegel exercises on a daily basis:

3 sets of 10 reps, where each rep is a 10 second contraction, followed by a 10 second relaxation of the PC muscles.

Oh and by the way – if you want a stronger, longer-lasting erection – you should do daily Kegel Exercises too.

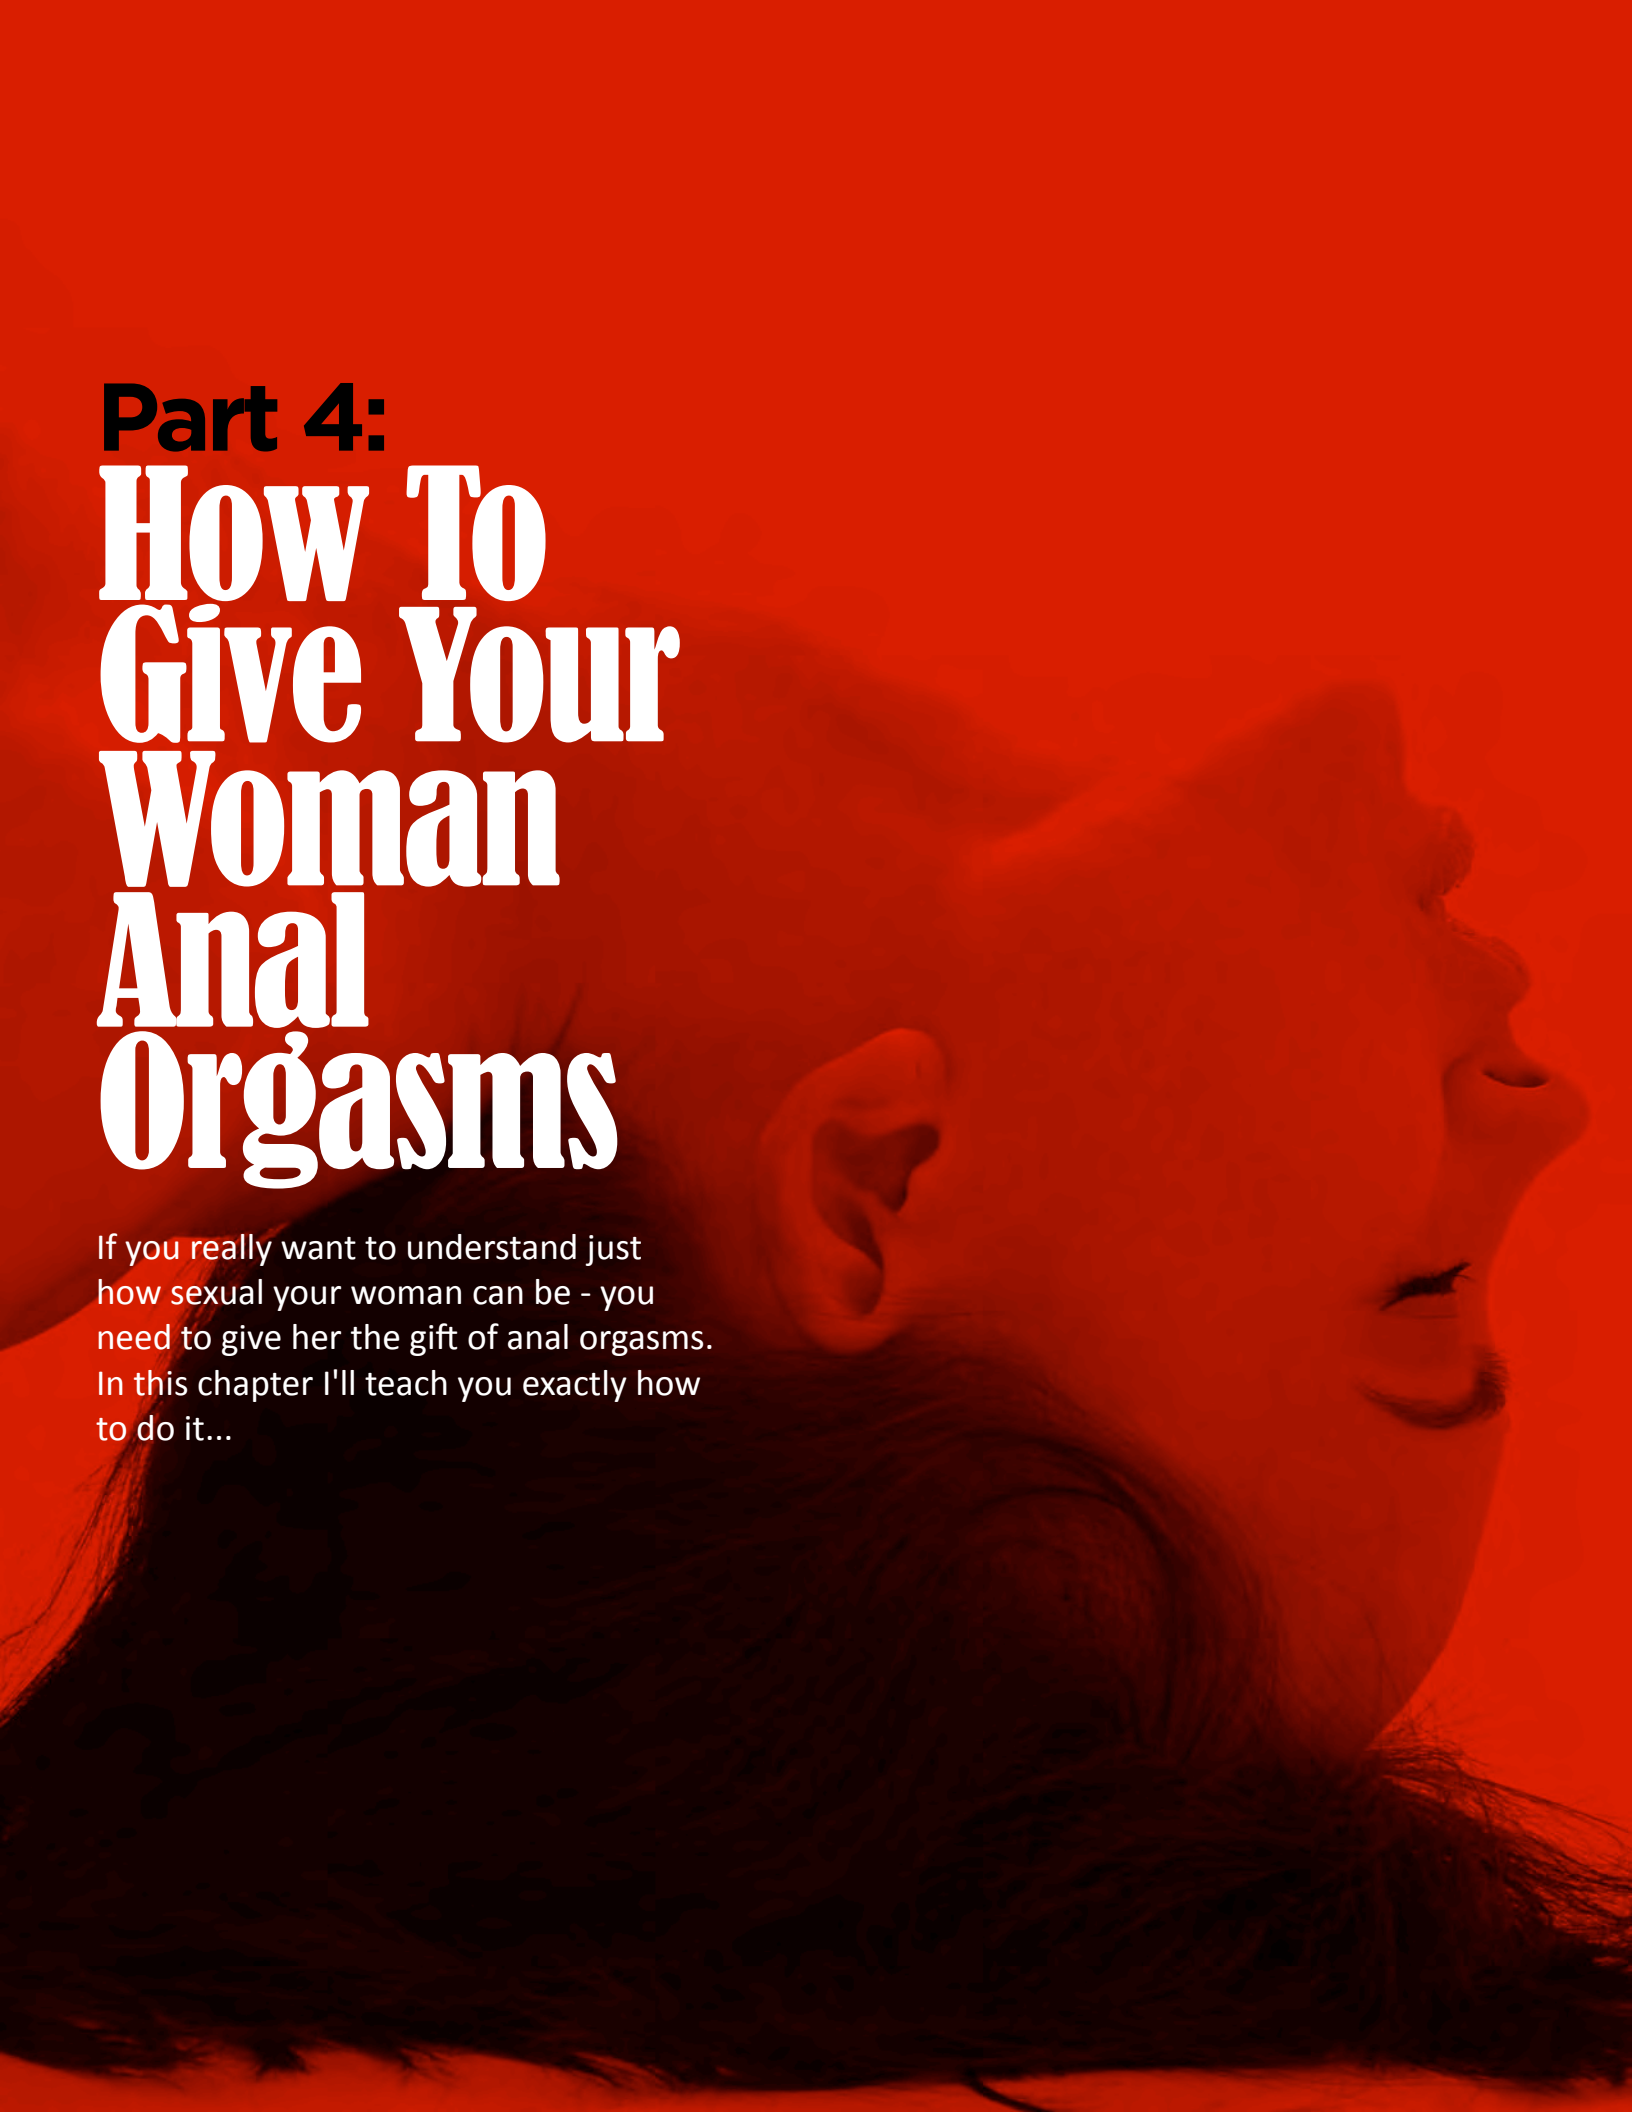

So far, we've discussed many techniques regarding the vagina and clitoris. We've talked about stimulating your woman's clitoris with your fingers and via oral sex. We've also talked about G-Spot vaginal orgasms and various different ways to give your woman A-Spot vaginal orgasms.

We've also covered how to easily give your woman multiple orgasms, simply by getting the vaginal orgasms working. And we've most recently discussed squirting orgasms.

Right now, we're going to move on and talk about a kind of orgasm that is perhaps the most powerful of all...

The ANAL ORGASM...

Part 4: **How To** **Give Your** **Woman** **Anal** **Orgasms**

If you really want to understand just how sexual your woman can be - you need to give her the gift of anal orgasms. In this chapter I'll teach you exactly how to do it...

Part 4:

How To Give Your Woman Anal Orgasms

Anal orgasms are super powerful.

In fact, if you want to totally blow your woman's mind and give her the best sex ever – anal orgasms must be on your 'to do' list in the bedroom.

I have no idea what percentage of women have experienced anal orgasms, but it's safe to say that it's very low. We are definitely talking less than 1% and maybe less than 0.1%. That last figure would be just 1 in a 1000 women by the way.

Whatever the exact number (and we'll never accurately know – for obvious reasons) ... anal orgasms are 'the real deal.'

Before we delve right in and talk about the technique you can use to give your woman an anal orgasm, we need to discuss 'anal play' in general.

The fact of the matter is that many men would like to have anal fun with their women and ultimately – they'd like to have anal intercourse. Unfortunately, most of the men who would like their women to give them full access to their ass – have no idea how to go about making this happen.

Here is how the average guy views anal sex...

He starts off by thinking to himself:

"I want to have anal sex with my woman"

Next, he thinks the most logical thing to do is to ask his woman for anal sex. At this point, most women will say "NO."

So the average guy keeps asking and asking and asking and in the end it seems like he's begging his woman. In fact, he is begging her. Not cool.

The outcome of all this begging is usually one or both of the following things:

- **His woman gets really annoyed because he keeps asking and she keeps saying “NO” and this leads to arguments and problems within the relationship**
- **She gives in and agrees to have anal sex and it ends up being painful for her. The outcome of this is that she very likely will *never* try anal sex again (at least not with her current man)**

So the message here is clear...

Don't try to bully your woman into anal sex by asking/begging her over and over again because it simply won't produce satisfying results for you or her.

If the average man doesn't go down the asking/begging route – he usually resorts to 'accidentally' slipping it in his woman's back door during intercourse. This is a disaster for the following reason...

- **Accidentally slipping it in your woman's ass is going to almost certainly cause her PAIN**

We've now discussed the two ways most guys try to get their women to have anal sex:

- **The asking/begging way and the 'accidental anal' way**

Neither work well and I'm recommending that you ***never*** go there.

With that crap out of the way, we're now going to discuss the real man's approach to getting his woman to BEG him for anal sex.

“YES,” I'm being *totally* serious – I'm going to teach you how to get your woman to BEG YOU for ANAL SEX.

Just think about that for a second...

While all the other guys are asking, begging and whining to their women in pathetic attempts to get them to give them anal sex – you are going to smoothly turn your woman onto the idea of anal sex and make her beg *you* for it.

Are you excited? You should be.

Tell Your Friends

So let's get right into it...

We'll begin by taking a look at how most women view anal sex...

Always keep in mind the fact that women love naughty, dirty sex and that they love to do taboo things in the bedroom.

And anal sex is about as naughty, dirty and taboo as it gets. Therefore, most women would like to try anal sex under the right circumstances. Note that I said 'under the right circumstances.'

Oh and by the way – just because women don't often openly say that they want to try anal sex or like the thought of it... that doesn't mean they don't want it.

In public, women might say that anal sex is not of interest to them or that it disgusts them. The reality is that they are saying these things to avoid being seen as dirty or slutty.

But in the bedroom, behind closed doors, with their men – women want to get slutty.

The real reason most women don't grab their men by the hand and ask them to take them up the ass is because of FEAR.

As simple as it sounds – that's the reason.

On the one hand, women think:

"Yeah, I'd love to try anal because it's really dirty and naughty"

But on the other hand, they are thinking:

"Ouch. It's going to hurt"

And that's enough to stop most women from trying anal. And guys who ask/beg or slip it in by 'accident' are not helping to get rid of the woman's fear of pain relating to anal sex.

The truth is that if you want to get your woman to beg you for anal sex, you need to help her overcome her fear of pain during anal sex and get her to replace that fear of pain with MASSIVE PLEASURE.

Once you have gotten your woman to associate massive pleasure to having you touch her ass – she will be happy for you to have as much anal play as you want.

Here's how you do it...

How To Get Your Woman To Associate Massive Pleasure To The Idea Of You Touching Her Ass

The ultimate goal here is to give your woman an ANAL ORGASM.

Giving her an anal orgasm is the ultimate anal pleasure you can give her. However, depending on how open your woman is to anal play – you may have to take a few days or a couple of weeks to get her to the point where you can give her her first anal orgasm.

The reason for this is because the technique for giving her an anal orgasm requires you to have your finger in her ass. And if you've never done that to her before, there's some smaller steps you need to take first.

As the old saying goes:

"You have to walk before you can run"

The rule for introducing anal play into your relationship is at first to only touch your woman's anus when she is very close to having an orgasm and during the orgasm itself.

The reason for this is because when your woman is close to coming and actually coming – she will be experiencing so much sexual pleasure that she'll be caught up in the moment and she won't stop you touching her ass, provided you do it like this...

The first time you touch her ass with your finger, do so during ORAL SEX. When she is very close to coming, gently rub her anus with your finger tip. The key word is 'gently.'

Remember – it's much better to start off slowly than to push too far too fast and scare her off the idea of anal play for good.

That first time you gently rub her anus when she is close to coming and during orgasm, you have done something most guys will never do... you've taken the first steps to getting your woman to associate having you touch her ass with experiencing immense sexual PLEASURE.

In other words, you've done something to eliminate some of the fear of PAIN she had regarding anal play.

The second time you touch her ass, insert the tip of one of your fingers into her anus when she is very close to coming and during orgasm. When I say the 'tip' of one of your fingers, I mean up to the first knuckle and no further.

At this point you've now got your woman to start to link anal penetration and sexual pleasure together.

Can you see how powerful this is getting?

The next step is to insert more and more of your finger into her ass when you are giving her oral sex.

Here's how that looks:

- **Night one: rub her anus (as discussed)**
- **Night two: insert the tip of your finger (as discussed)**
- **Night three: Go to the second knuckle**
- **Night four: Push your finger all the way in**

At this point you have successfully got your woman to enjoy the feeling of having your whole finger in her ass as she has an orgasm (and you get to enjoy the feeling of her anus contracting around your finger as she comes).

Important Point: when a woman has an orgasm, her anus will involuntarily contract. If it doesn't contract – she isn't having an orgasm. Now you know how to tell a REAL orgasm from a FAKED orgasm.

Be sure to take things slowly and if you need to - repeat a step to avoid pushing her too far too soon.

Remember – you must avoid causing her pain at all costs, even if it means taking things very slowly. Think 'baby steps', not 'giant steps.'

This is a marathon and not a sprint.

And by the way...

Tell Your Friends

You can use the routine I just described not only with ORAL SEX, but when you do her 'doggie-style' or in the missionary position too. If you want to use these approaches, simply use the steps I described as you give your woman vaginal orgasms during intercourse.

In the 'doggie-style' position, use your thumb.

In the missionary position, reach under her leg and use your index or middle finger. Whatever route you go down – oral sex, doggie-style or missionary – get her to the point where you have your entire finger up her ass as she climaxes and then progress to the next step in the process...

[Click here](#) to see a butt plug that I recommend you use on your woman

For this step, you'll need to buy a small **butt plug**.

A butt plug is a specially designed sex toy for the anus. Butt Plugs are designed to be thin at the tip and they get progressively wider towards the base, making them perfectly shaped for anal penetration.

I like to use a butt plug to 'bridge the gap' between my finger and my penis. You should do the same.

So the trick is to buy a butt plug that's somewhere between your finger and your penis in size. Again, only insert the butt plug when your woman is extremely excited and keep it there during orgasm.

At this point your woman is really starting to associate having her ass stimulated with experiencing sexual pleasure.

By the way, make no mistake about it – if you follow these steps and never push too far too fast, your woman will be starting to think about having full on anal sex with you, even if she doesn't tell you that is the case.

To make her not only think about anal sex, but actually BEG you for it – you are going to give her **the anal orgasm**.

Here's how you do it...

The Anal Orgasm Technique

The first thing you need to know before you give your woman an anal orgasm is that the wall that separates her anus and vagina is very thin. This means that while your finger is inside your woman's ass, it is quite easy to locate her G-Spot or A-Spot (with that same finger) and stimulate her to the point of orgasm.

WARNING: Do not attempt this technique until you have followed all the previous steps in this section on ANAL ORGASMS.

If you have done all those steps, go ahead and blow your woman's mind like this...

Start off by getting her really turned on, wet, sexually excited and well – you get the idea.

Then give her a clitoral orgasm and at least one vaginal orgasm.

Now have her lie on her back with her legs open.

Then take your middle finger and insert it into her ass with your palm facing upwards. (Obviously your finger needs to be very well lubricated).

Now find her G-Spot (or A-Spot).

It won't be as obvious as when your finger is inside her vagina because you now have to find her G-Spot through the wall that separates her vagina and anus, but be patient and you'll find it.

Remember – the G-Spot is just one to two inches inside the vagina on the front wall. Once you have it, use the same 'come hither' motion that you would use to give your woman a regular G-Spot vaginal orgasm and keep going until you make her climax.

Then you have done it – you've given her an ANAL ORGASM.

Very powerful.

I've known several women to turn around immediately after having an anal orgasm in the way that I have just described and quite literally BEG for anal sex and this is not surprising when you think about it, IF you follow all the steps I've laid out for you.

The bottom line is that you have totally destroyed your woman's PAIN association relating to anal sex and you've replaced them with nothing but thoughts of PLEASURE.

So that's how you get your woman to not only give you her ass – but actually *really* want you to take it.

There's just one more thing to discuss...

Anal Penetration And Anal Orgasms During Intercourse...

In porn movies it's common to see well hung guys absolutely smashing girls up the ass.

But you have to understand what's really going on...

Many porn actresses are using anal numbing creams when they are shooting their scenes. And whilst this allows the guy to easily penetrate her anus, it has some lousy consequences:

- **She can't feel anything, so anal orgasms certainly aren't going to happen**
- **Because she can't feel anything, the male porn star may be causing her damage and she'll only find out once the cream's 'numbing powers' wear off and she's left with a very sore ass**
- **I've read stories of adult porn actresses having to wear nappies because they have had too much aggressive anal sex**

Clearly these are not things you want to put your woman through! It goes without saying that I DON'T recommend anal numbing creams or sprays.

The truth is that what you see in porn is pretty much the EXACT opposite of what I'm teaching you...

I'm teaching you how to give your woman mind-blowing pleasure. In contrast, the porn industry is often exploiting women in any way they can, just to please the sad idiot watching at home with his pants round his ankles, wishing he had a REAL woman to 'get naughty' with.

With that in mind, **here are some things to consider regarding anal sex:**

- **Don't do it ALL THE TIME because if you do – your woman might end up with problems**
- **When you insert your erection into her ass, do so very slowly and allow her to get used to the feeling**
- **Once you're all the way in, pause for a few seconds – enjoy the feeling – and allow her to get used to the sensation**
- **Then start to move slowly at first and pick up the pace with caution**
- **If she asks you to STOP, do so – otherwise you'll undo all the hard work you've done to expertly get to the point where she wants anal sex**
- **If you ever pull your penis (or finger) out of your woman's ass and notice a little fecal matter – DO NOT make her feel bad about it because if you do, you'll ruin her confidence and lessen her desire for anal play. If it happens – and it might – be cool about it and handle it in a mature way**

Now, what about those anal orgasms during intercourse?

Haha.

Believe me when I tell you...

Anal orgasms during intercourse are the most powerful orgasms of all.

Forget about waking the neighbors... when you give your woman anal orgasms during intercourse she'll likely scream and moan so loud she'll wake half the freakin' street!

Nice.

The question is:

"How do you make anal orgasms during intercourse happen?"

Pay attention, because they don't teach you this ANYWHERE else...

The truth is that once you give your woman anal orgasms using your fingers, you've done 90% of the hard work because you've now gotten her to associate massive pleasure to you touching her ass.

Some women might find it relatively easy to orgasm via anal intercourse, if their men followed all the previous steps including giving her anal orgasms with his fingers.

However, there is something you can do to 'help her on her way' and cause her to have literally mind-blowing anal orgasms during intercourse:

- **Talk dirty to her as you penetrate her**

Now I know this isn't a program on DIRTY TALK, but I'm going to give you an example of how to use dirty talk as you give your woman anal intercourse. I like to over-deliver ;)

Here goes:

NOTE: Be aware that the very adult language used in this dirty talk example is entirely appropriate when talking dirty. It'd be entirely inappropriate in the living room, but everything has a time and a place. It's all about understanding context.

YOU: "You love it when I fuck your ass, don't you baby?"

HER: "Yes"

YOU: "It feels so good when I fuck your ass"

HER: "Yes it does"

When you can tell she's close to orgasm, say:

YOU: "You want to cum hard for me, don't you?"

HER: "Oh God YES"

YOU: "You love to do as you're told and cum when I tell you too, don't you baby?"

HER: "Yes. Please tell me to cum"

YOU: "Cum for me baby, come hard. Come right now"

And if you time your words correctly and deliver them in a commanding, authoritative way – that's EXACTLY what she'll do.

It's powerful stuff.

Anal orgasm during intercourse... The Holy Grail?

Quite possibly.

Or maybe the holy grail is MULTIPLE anal orgasms during intercourse. That's possible too – using precisely what I've taught you in Ultimate Orgasm Techniques.

Let's re-cap this anal orgasm section...

Anal Orgasm Summary

- Before touching your woman's ass make sure your hands are clean and smooth
- Always use plenty of lubrication
- Until you have given your woman her first anal orgasm, only touch her ass when she is close to coming and during her orgasms
- Start off by touching her anus with your just the end of your finger. Then move on to penetrating her ass with your finger tip, half your finger and then your whole finger
- Next, use a butt plug (somewhere in between the size of your finger and your penis)
- Then give her an anal orgasm using the technique described in this chapter
- At this point your woman will either beg you for anal sex or will at the very least be willing to try it
- Always keep in mind that women do want to try anal sex, they just worry it might hurt. As an expert lover, your job is to rid your woman of the thoughts she has of anal sex and pain and slowly get her to replace them with thoughts of anal sex and pleasure
- If at any point you sense your woman is not enjoying what you are doing, take a step back and proceed at a slower pace. There should be no rush. When you rush and push too far too fast – you run the risk of turning your woman off the idea of anal play forever. Remember – expert lovers are always patient... only fools try and rush their women
- Finally, never put anything that's been in her ass, back in her vagina (until you have thoroughly washed it)

Right now you know all that you need to know about clitoral, vaginal, multiple, squirting and anal orgasms. But I'm not done yet. I still have to teach you how to get the most out of all these techniques.

Read on and you'll see what I mean...

A romantic couple in a close embrace, nearly kissing, with a red overlay.

Part 5: **The Master Plan**

In this chapter I'm going to teach you how to best use everything you've learned in Ultimate Orgasm Techniques for maximum effect...

Part 5: **The Master Plan**

How To Use All The Techniques In Ultimate Orgasm Techniques To Maximum Effect...

The amount of new sexual techniques that you have discovered in the Ultimate Orgasm Techniques program might at first seem a little daunting.

But don't worry – you don't have to use them all at once.

The orgasm techniques provided in this program have been presented to you in a logical order.

For example, we started off by looking at clitoral orgasms because these are the easiest and most basic type of orgasm to give your woman.

Then we moved on to look at vaginal orgasms (both G-Spot and A-Spot) because they enable your woman to experience a deeper level of sexual pleasure and **MULTIPLE** orgasms.

NOTE: In popular men's and women's magazines, multiple orgasms are often referred to as if they are a total mystery. But there's nothing mysterious about them. Just get the vaginal orgasms working and, **BOOM** – multiple orgasms become the 'norm.'

Next, we talked about squirting orgasms - which are directly related to vaginal orgasms- and then we talked about more advanced techniques like vaginal orgasms during intercourse and anal orgasms (both of which are much easier to pull off if you are already giving your woman vaginal orgasms using the G-Spot and/or A-Spot methods).

Can you see the progression method?

First, get clitoral orgasms working using your fingers and oral sex.

Then get vaginal orgasms working using your fingers.

Then get vaginal orgasms working during intercourse and finally – look to get your woman squirting and having anal orgasms.

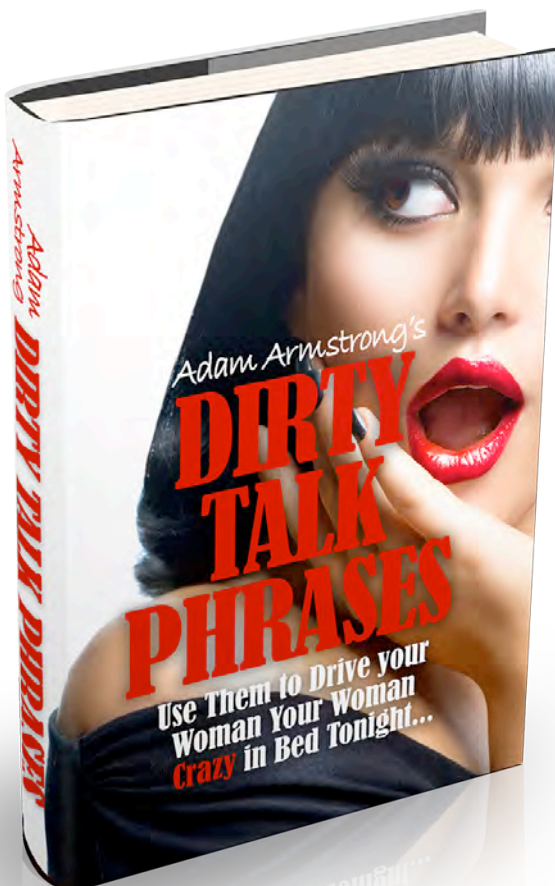

The other thing you might be wondering is:

“Where exactly does dirty talk fit into all of this?”

The answer is...

Everywhere.

In my program Dirty Talk Phrases program I give you examples of dozens of tried and tested dirty talk phrases that you can take and use ‘as your own.’ Check that out by [clicking here](#)

The only techniques I discussed with you that don't directly benefit from the addition of dirty talk are the oral sex techniques because you can't talk when you are giving oral sex.

However, even oral sex is a lot better for your woman when you make some noise as you pleasure her with your tongue. Sure, it'll only be caveman like 'grunts' – but that's so much more exciting for your woman than silent oral sex.

The truth about silent sex is that it is lame sex.

Dirty talk is where the party is at.

Here's the deal...

When you combine the techniques in Ultimate Orgasm Techniques with a strong dose of dirty talk – you'll greatly increase your results in the bedroom.

A Great Way To Blow Your Woman's Mind Every Time You Have Sex

Here's a fool-proof way to blow your woman's mind every time you have sex with her:

- **Give her a clitoral orgasm**
- **Then give her two vaginal orgasms using the G-Spot or A-Spot fingering techniques**
- **Then give her at least one vaginal orgasm during intercourse**

Can you imagine how SEXUALLY SATISFIED your woman will be if you give her that type of pleasure every time you 'get it on' with her?

Most guys are struggling to find their women's clitorises, let alone know what to do with it when they find it.

Yet when you apply what you've discovered in the Ultimate Orgasm Techniques program, you'll start to see the clitoral orgasm as just a 'warm up.'

It's mind-blowing stuff.

Have fun with it.

Of course, you don't always have to follow the approach I laid out above.

For example, sometimes you and your woman might want to have a 'quickie' - and there's nothing wrong with that... quickie's can be a ton of fun.

But for the average guy, a 5 minute quickie is a problem because it's probably not long enough to give his woman an orgasm. So the quickie is not that appealing for her.

However, once you really connect with your woman emotionally and get her having regular vaginal orgasms during intercourse - you'll see that it will become very easy to 'get your woman off' very quickly.

And what that means is that you will be able to have a quickie with your woman and have a clear conscience. You'll come and she'll come too (maybe more than once).

Whatever you do, remember that the sex is only rewarding for your woman if you give her orgasms.

Yes, some women say that they don't need to orgasm to have great sex – but these are women who've almost certainly never had a vaginal orgasm and therefore don't know what great sex is. And most of the time – when women say that they don't need orgasms to have great sex – they're just saying it to protect their man's feelings.

The bottom line is that if you want to give your woman great sex... you must give her vaginal orgasms.

What To Expect When You Successfully Use The Techniques In The Ultimate Orgasm Techniques Program...

Most men take the easy way out and give their women lame sex.

Some of these guys don't even realize it's lame sex and others don't give a damn.

But the truth is that the guys giving their women lame sex will pay a huge price.

For starters, they'll never experience the satisfaction and sense of achievement that comes from giving their women incredible sexual pleasure. Such men would probably rather watch football or drink beer until they can no longer stand up straight.

More fool them.

Secondly, high value, emotionally healthy women will not stand for lame sex forever and such women will often cheat to GET BETTER SEX.

At this point, the guys on the receiving end of being cheated on usually say their women are 'bitches' or use some other degrading term to describe them.

However, I choose to take a different view...

- **He didn't perform and meet her needs in the bedroom, so she found another guy who could meet her needs. Simple as that**

Anyway, given that you are reading this book it's obvious to me that you are serious about sexually satisfying your woman and giving her incredible sexual pleasure.

When you start using the techniques in this book and do so to give your woman amazing orgasms, you can expect the following things to happen...

- **Your woman will want to have MORE SEX. In other words, her sex-drive will increase. It is my experience that when a guy gives his woman regular vaginal orgasms, his woman's sex-drive will be at least as high as his own and if not higher. So no more 'dry-spells' in your relationship**
- **She will become more vocal during sex. She'll scream louder (a by-product of experiencing vaginal orgasms) and she might even join in with the dirty talk**

“

***When the sex is good,
it tends to draw to
people closer
together and make
them more grateful
for having each other
in their lives***

She'll go out of her way to please you. Again, once you start giving her regular vaginal orgasms you'll notice that your woman will start to give you everything you want during sex. I have a concept that explains why this happens.

The concept says that "Women are creatures of Sexual Reciprocation."

Now, what do I mean when I say that "women are creatures of sexual reciprocation?"

Well, when I say that women are creatures of sexual reciprocation, I mean that they give back as good as they get in the bedroom. So if you give your woman incredible pleasure, she'll go out of her way to give you incredible sexual pleasure too.

NOTE: This does not work the other way round. You have to give your woman really great sex and then she'll start giving you better blow jobs, hand jobs, anal sex and whatever else you want in bed. This happens every time

- **When you give your woman great sex, including regular vaginal orgasms – you will also notice that your relationship outside the bedroom will likely improve as well. When the sex is good, it tends to draw to people closer together and make them more grateful for having each other in their lives**

You now know *exactly* how to give your woman the best orgasms of her life...

But what if something doesn't go as planned?

Don't worry, the next section covers some common problems and how to overcome them...

Part 6:
**Ultimate
Orgasm
Techniques:
FAQ's**

Here's a giant list of the most common questions I get from men about satisfying their women in the bedroom...

Common Problems And How To Overcome Them: Do Not Ignore This Section!

This section uses a 'Q and A' style layout and covers some of the most common questions I get from guys about sexually satisfying their women.

Q: **My woman enjoys it when I use The A-Spot Method, but I've never done it for long enough to give her an orgasm because my wrist and forearm get too tired and I have to stop. Is there another option?**

You need to MAN UP. Admitting that your wrist ache is preventing you from giving your woman a vaginal orgasm is like admitting you are afraid of the dark.

You might be, but as a man – you don't do it.

So man up, take the (slight) discomfort and give her the damn orgasm.

I've been dating my current girlfriend for 4 months. She's 32 years old and has never had an orgasm. I'm not having any luck getting her to orgasm either. What should I do?

Given that she's 32 and never had an orgasm, you have to understand that in her mind – she probably thinks she can't have an orgasm. I say this because she's tried to give herself an orgasm and so have some men (including you) and to date – nothing's happened.

However, you must stay positive and realize that if she has a brain and a vagina – she has the ability to have an orgasm. All you have to do is find the right strategy.

That strategy must not make a big deal out of the situation. If you do make a big deal out of the situation, you will just reinforce her belief that she can't orgasm.

Instead, here's what I'd do if I were in your position...

Take her to the bedroom and relax her. Light some candles and give her massage. Just get her really used to associating your touch with her feeling GOOD.

Providing you give her a half decent massage and she is attracted to you, she is going to get wet as you are massaging her.

When you know she is wet, get her to turn over onto her back and use The Welcomed Method on her (see Part 1: How To Give Your Woman Clitoral Orgasms). As you use The Welcomed Method, do not mention anything to do with orgasms.

Just tell her to relax and enjoy the feelings you are giving her. You have to teach her to relax and associate your actions in the bedroom with sexual pleasure.

It may take you more than one attempt but I'm quite sure you'll succeed with this approach.

Most guys make a mess of things by focusing on the orgasm instead of the experience of pleasure and all this does is give the woman performance anxiety.

NOTE: Male performance anxiety usually results in no erection, loss of erection or premature ejaculation. Female performance anxiety results in lack of orgasm.

Do the opposite, take your time and get her to relax and you'll be the first guy to give her the big "O."

I have an embarrassingly small penis and I fear that it is not enough to please any woman. What should I do?

For starters, stop worrying about things you cannot control. Worrying about things you cannot control is a dead end street – it will get you nowhere.

Next, realize that the vast majority of women are not interested in penis size. Yes, there will always be a few ‘Size Queens’ out there but most women do not fall into that camp.

What most women want are orgasms.

And using the techniques in the Ultimate Orgasm Techniques program, you can give your woman mind-blowing orgasms using only your middle finger (see the G-Spot and A-Spot vaginal orgasm techniques in Part 2.).

So tell me – if you can give your woman vaginal orgasms using only your middle finger... is ‘size’ really an issue?

No it’s not.

Here’s what you must do (regardless of your penis size)...

Get the clitoral orgasms working with your woman. Then give her vaginal orgasms and then get the vaginal orgasms working during intercourse.

Do that and she’ll be a very happy woman. Period.

And do not tell me your penis is not big enough to give her vaginal orgasms during intercourse because the G-spot is only one to two inches inside her and the A-Spot is only a fingers length inside her.

Also note that when you ‘awaken’ her vagina using The A-Spot Method she will become a lot more sensitive during intercourse, making it much easier to give your woman vaginal orgasms during intercourse.

The worst thing you can do is get depressed about the size of your penis because it’ll destroy your sexual confidence and if there’s one thing women really do like in the bedroom – it’s a man with sexual confidence.

True sexual confidence comes from knowing you can give your woman mind-blowing orgasms any time and any place and your ability to do that has nothing to do with your size.

I'm thinking of buying a rubber penis enlarger. Basically, it's like a sleeve that goes over the end of my penis and makes it bigger. What do you think?

Oh dear.

Are you trying to ruin your masculinity?

Seriously, man up.

Put yourself in your woman's shoes for just a second and imagine what she'll think when you take five minutes out from foreplay to go put your rubber penis extender on.

When you come back with your 'new penis' she is going to lose all respect for you. In her eyes, every ounce of manliness and masculinity you had just disappeared because you basically just admitted that you are not proud of your penis.

Don't even go there.

Use what you've got 'down there', be proud of it and use the techniques in this program. Then you'll soon realize that 'size' is not the issue and all you really need to give your woman THE BEST SEX EVER are sound sexual beliefs, basic knowledge of female anatomy, some great sexual techniques, the ability to be dominant in the bedroom and a little dirty talk.

I've been using The A-Spot Technique for some time with my woman and she loves it. She has powerful orgasms when I use it and she has started to come during intercourse as well. My question is – why hasn't she squirted yet?

First of all – you're doing a great job.

If you are giving her A-Spot vaginal orgasms and vaginal orgasms during intercourse, you are giving her what most men will never give their women... GREAT SEX.

I do not have all the answers regarding female ejaculation and I can only share with you experiences from my own private life and that of my clients.

What I can say is that I know of other women in a similar position. They have vaginal orgasms but have not ejaculated yet. I wouldn't worry about it too much.

Just remember that she has to 'push' the feeling out when she feels the urge to pee during sex. That's really the urge to ejaculate. If she holds it back – she won't squirt.

Whatever happens – you're doing a great job. Vaginal orgasms are where the party is at.

With that said, you can increase the likelihood of making your woman squirt by getting her to do Kegel Exercises (see Part 4 on Squirting Orgasms).

I've been with my wife for 3 years. We used to have sex pretty much every day, but for the past year or so, I'm lucky if I get it once a week. How can I get more sex?

The reason why your relationship with your woman is becoming more and more sexless is because you are too SELFISH.

Look at the way you write...

"I'm lucky if I get it once a week."

"How can I get more sex?"

I recommend that you evaluate your approach before you really mess things up and she cheats on you or leaves you.

Sex is a shared experience.

To get your woman to want to have sex more frequently, you have to give her GREAT SEX.

That means giving her orgasms.

Lots of orgasms.

Familiarize yourself with the techniques in this program and commit to giving your woman a clitoral orgasm and at least one vaginal orgasm before you even take your pants off – EVERY TIME you have sex.

This way you show her that you care about her sexual pleasure and she'll soon start wanting to have sex again. When it comes to sex – you have to give in order to get.

I think Tony Robbins says it best when he says:

“The greatest gift in life is giving”

Sadly, most men don't get that, especially in the bedroom.

I cheated on my woman and she found out. Since then nothing's been right. She's not as into the sex and it's happening less and less frequently. Any advice?

My parents brought me up well and my Mum always said to never cheat on a woman. She said that if you don't want to be with somebody anymore – you should be honest and leave them and then find somebody else.

This was very good advice.

You see, to have a really great sexual relationship, there needs to be mutual respect. You need to respect your woman and she needs to respect you.

You also need trust – both outside the bedroom and inside it.

Trust is built by being honest and by being a man of your word.

Unfortunately, you've messed up and you've damaged the trust your woman had for you. She's also lost respect for you.

Things will probably never be the same for you and your woman. You have two options – either put the time in and see if you can make it something like it used to be (you'll have to try and gain back her trust and her respect).

Or...

End it and find someone new.

I can't make the decision for you.

I started using The A-Spot Method with my woman and she loved it. It's amazing. She's started having multiple orgasms every time we have sex and our relationship is better than ever. There's just one small problem – she's often sore the next day, (after I've used the a-spot method). Why is this?

The vagina is a sensitive part of a woman's body and the A-Spot method requires fairly intense pressure. Sometimes it is possible to do it a little too hard and make a woman sore.

This is nothing major to worry about.

Just be aware of it.

Once a woman gets used to the feeling of having vaginal orgasms via the A-Spot method – she usually doesn't need quite as much pressure to 'get her off' anymore. So experiment with a little less pressure and a little more lubrication. Also make sure she is extremely turned on before you use the technique.

My woman doesn't respond well to dirty talk. I've tried a few times and she laughed at me. Help!

It is possible to mess up dirty talk. It's not like you can just say anything in the bedroom and have your woman climaxing.

You have to get good at dirty talk in order for it to be effective.

Remember these points:

- **You must respect your woman and she must respect you. If she doesn't take you seriously outside the bedroom, she won't take you seriously inside the bedroom**
- **You have to talk with authority and believability. If your woman senses that you are nervous as you talk dirty, she won't enjoy it**
- **The more sexually excited she is, the more 'hard-core' your dirty talk can be**

- **Use the word “my.” Don’t say this to your woman... “You’re a bad girl.” Instead, say this... “You’re my bad girl”**
- **Finally, remember that the longer you’ve known a woman and the better the sex you are giving her, the dirtier you can talk to her in the bedroom. You have to earn the right to talk really dirty to your woman**

Combine dirty talk with the techniques in Ultimate Orgasm Techniques for maximum effect

You talk about having respect for women but then you tell guys it’s okay to make women give them blow jobs and anal sex. That’s not being respectful to women. Why are you pretending you are something you’re not?

Everything in context my friend; everything in context.

When did I ever say to make a woman give you a blow job or anal sex?
The answer is NEVER.

I teach men to behave in a way that virtually guarantees that their women will want to give them blow jobs, anal sex and get really naughty in the bedroom.

I teach men to respect women outside the bedroom, treat them well and develop a deep and meaningful connection with them.

Then I teach them to give women what they want in the bedroom, which is naughty, dirty sex with a ton of orgasms!

When a man does this, he is giving his woman the best of both worlds. If you want a happy, fulfilling, wildly sexual relationship – there is no other option.

If you’re really ‘nice’ outside the bedroom but a wimp within it – your woman will leave you or cheat, or at the very least be unhappy.

On the other hand, if you give your woman good sex but treat her like crap outside the bedroom, the result will be the same - she’ll leave or cheat, or at the very least be unhappy.

Hey Adam, how can I tell if my woman is having real orgasms or fake orgasms?

Great question.

And the answer is: very simply.

Here's how:

When she orgasms for REAL, her anus will involuntarily contract. If she's 'faking it', her anus won't contract.

It's as simple as that.

So when she is having the 'orgasm', gently place the tip of your finger on her anus and see if it contracts.

If it does – you're golden.

If it doesn't – you need to figure things out and do so FAST.

Remember – the sex is only fulfilling for your woman if she has real orgasms and plenty of them.

Ultimate Orgasm Techniques: Summary

Tell Your Friends

Part 7: **The Summary**

You've learned a lot in this program my friend.

Basically – I've taught you what it took me the best part of a decade to master and I've condensed it down into one program for you to read and apply in your own time.

Use this PDF as a reference book that you can dip into and out of whenever you need it.

Here are the most important points to take away from this book:

- **Most women have only ever had clitoral orgasms and 20-30% of women have NEVER had a single orgasm. This says a lot about how lousy most men are when it comes to giving women pleasure**
- **Vaginal orgasms are a 'game-changer.' First, make them happen with your fingers and then get them working during intercourse and then one thing and only one thing will happen... your woman will become sexually ADDICTED to you**
- **Multiple orgasms – viewed as such a mystery by most men and women – are remarkably simple to make a reality for your woman. Just get the vaginal orgasms working and the multiple will follow because unlike the clitoris – which becomes hyper-sensitive post orgasm – the vagina suffers no such issues**
- **The same techniques you use to make the vaginal orgasms happen for your woman can also be used to make her SQUIRT. Squirting will increase the pleasure she experiences when she climaxes**
- **Anal orgasms are probably the most powerful orgasms of all. First get them working with your fingers and then make them happen during intercourse. Do that – and you're close to SEXUAL MASTERY**
